Relevant Query Answering over Streaming and Distributed Data Shima Zahmatkesh, Emanuele Della Valle, 2020-01-21

This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data. In recent years, Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention. Answering in a timely fashion, i.e. reactively, is one of the most important performance indicators, especially when the distributed data is evolving. The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time. A limited refresh budget guarantees the reactivity of the system. Focusing on stream processing and Semantic Web, it appeals to scientists and graduate students in the field.

Trout Unlimited's Guide to America's 100 Best Trout Streams, Updated and Revised John Ross, 2013-09-17. The Penobscot, Penns Creek, the Little River, Guadalupe, Firehole, Copper River, these streams and ninety-four others like them provide the best trout fishing in America, say members of Trout Unlimited (TU). With a dozen or more streams in each of eight regions, one of America's one hundred best trout streams flows within a few hours' drive of most of the nation's anglers. These are the rivers that anglers dream of visiting. Describing species, hatches, the flies and lures, and when to fish, each profile contains information and maps that boost angler success. Profiles present as well the environmental challenges facing each stream and the role that TU and others play in protecting the fishery. Extensive interviews with anglers for whom each stream is home water add depth to personal observations formed when award-winning writer and angler John Ross fished many of these streams himself. Many who buy the book set out to fish all the streams. For others, the guide is an essential ingredient in the planning of fishing and family vacations. It's a book that's as at home next to a fly tyer's bench as it is tucked in the console between the seats of a pickup truck. A portion of the sale of each book goes to Trout Unlimited to help protect and sustain coldwater fisheries.

Streaming and Copyright Law Lasantha Ariyaratna, 2022-09-05. This book examines the challenges posed to Australian copyright law by streaming from the end-user perspective. It compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt

with streaming and copyright By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights The rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet Superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement These prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming It is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part Conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study When considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content s infringing nature Moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking End users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement Despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content This is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions
