The Performative Enterprise Alexander Tsigkas, 2021-10-01 This book is about quality redundancy and its replacement by the performativity norm. Performativity is a linguistic social and political mechanism that produces the intended performance. The author Alexander Tsigkas sees this book as a natural continuation of his prior book *The Lean Enterprise*. From the Mass Economy to the Economy of One. He argues that performativity is the flip side of quality on a coin called identity and in postmodernism that is in the age of Industry 4.0 and beyond, companies should be aiming for performativity and achieve quality as one of its many consequences. The author therefore encourages modern businesses to transition from quality orientation as conformance alone to a performance orientation. The author brings forward historic, current and philosophical perspectives in charting performativity as a new goal for modern businesses. Many examples, case studies and conceptual constructs are used to drive in the idea of how to create a performative enterprise.

Nutritional Psychology Andrea Cook, Jennifer Champion, 2025-03-31 *Nutritional Psychology: Understanding the Relationship Between Food and Mental Health* provides a broad look at the intersection between food and mental health and offers a comprehensive approach to effectively prioritize nutrition as a powerful component to maintaining overall wellbeing. Each of the 16 chapters deeply informs about a broad range of nutritional factors including those that promote stable blood sugar levels, optimize brain functioning and contribute to the microbiome and hormone levels so important to the brain-gut connection. There are useful insights into the dynamics of food selection, eating disorders, obesity, body image and nutrition quality that can stabilize or destabilize mental and emotional disorders. Additionally, environmental influences that shape eating behaviors are fully explored. *Nutritional Psychology: Understanding the Relationship Between Food and Mental Health* combines psychology, nutrition and medicine to form a framework for optimizing the relationship between diet and mental wellbeing. This textbook is designed for undergraduate and graduate psychology and nutrition college courses for students pursuing careers as psychologists, dietitians, nurses, social workers and a variety of health professionals who want to incorporate nutrition and eating behavior into their discussions with patients. Dr. Cook and Dr. Champion are both clinicians who work directly with clients with psychological and physical health issues and utilize a blend of nutritional and psychological interventions in their work, providing useful clinical applications for nutritional psychology.
