Michael Porter Generic Strategies:

Porter's (1980) Generic Strategies, Performance and Risk Jan Eldring, 2008-12-03 Inhaltsangabe Introduction In the summer of 2006 the board of Volkswagen announced the withdrawal from the luxury class market in North America due to unsatisfactory results with the Phaeton The Phaeton is Volkswagen's most prestigious project that should attack luxury carmakers as Mercedes or BMW More importantly the Phaeton should upgrade Volkswagen as a brand moving away from the image as a people's carmaker to a high end carmaker for business people as well Unfortunately the customers did not perceive Volkswagen as a producer of luxury class cars even though tests have shown that the Phaeton could actually compete against Mercedes or BMW on a technical level After drawing a balance the board decided to withdraw the Phaeton from the North American market On the other hand there are also success stories within the car manufacturing industry Porsche for example is able to outperform its competitors by bringing products to the market that set high value on quality and status Thereby Porsche became the most profitable carmaker in the world The other extreme is Toyota They outperform its competitors by bringing products to the market that are priced well below market average This case from the car manufacturing industry illustrates a good example in order to introduce the reader to the complex topic of corporate strategy and strategic choice Firms such as Porsche and Toyota lie at the edges of the strategic spectrum whereas Volkswagen underperforms since several years because their products neither appeal to quality conscious nor price sensitive customers However Volkswagen is able to generate profits that defend its position as the biggest car manufacturer in Europe although the firm cannot be assigned to one of the extreme points in the strategic spectrum as for example Porsche or Toyota Apparently these three firms can be separated on behalf of their strategic choice The question then ultimately arises why firms choose a certain strategy Why is Volkswagen not trying to compete on price with Toyota or trying to compete on outstanding products with Porsche Certainly that is easier said than done since definitions of successful strategies have not led to consensus yet in the academic world Several researchers formed the foundation for successful corporate strategies Among others Miles and Snow proposed defender prospector analyzer and reactor strategies that determine the success of a firm Their typology has been

Competitive Strategy Michael E. Porter, 2008-06-30. Now nearing its sixtieth printing in English and translated into nineteen languages, Michael E. Porter's *Competitive Strategy* has transformed the theory, practice and teaching of business strategy throughout the world. Electrifying in its simplicity, like all great breakthroughs, Porter's analysis of industries captures the complexity of industry competition in five underlying forces. Porter introduces one of the most powerful competitive tools yet developed: his three generic strategies—lowest cost, differentiation, and focus—which bring structure to the task of strategic positioning. He shows how competitive advantage can be defined in terms of relative cost and relative prices, thus linking it directly to profitability and presenting a whole new perspective on how profit is created and divided. In the almost two decades since publication, Porter's framework for predicting competitor behavior has transformed the way in which companies look at their rivals and has given rise to the new discipline of competitor assessment. More than a million managers in both large and small companies, investment analysts, consultants, students, and scholars throughout the world have internalized Porter's ideas and applied them to assess industries, understand competitors, and choose competitive positions. The ideas in the book address the underlying fundamentals of competition in a way that is independent of the specifics of the ways companies go about competing. *Competitive Strategy* has filled a void in management thinking. It provides an enduring foundation and grounding point on which all subsequent work can be built. By bringing a disciplined structure to the question of how firms achieve superior profitability, Porter's rich frameworks and deep insights comprise a sophisticated view of competition unsurpassed in the last quarter century.

Strategic Management Alexandra Kossowski, 2007. Seminar paper from the year 2003 in the subject Business Economics, Business Management, Corporate Governance, grade B 66%. University of Wales Institute Cardiff, Welsh School of Hospitality, Tourism and Leisure course Strategic Management. 15 entries in the bibliography. Language: English. Abstract: Strategy is the direction and scope of an organisation over the long term, which achieves advantage for the organisation through its configuration of resources within a changing environment and to fulfil stakeholder expectations. Johnson and Scholes 2002, p.10. Strategy plays an important, if not the most important, role in an organisation. Not only concerning competition but regarding all aspects of the business. Competition has always been the greatest fear of every businessman. Trying to think ahead of the competitors is the only option a successful business owner has. Developing a strategy, adapting and improving it, and ensuring that employees are aware of the business mission are only a few criteria which help to gain competitive advantage. Professor Michael Porter developed the so-called model of generic competitive strategies, which will be explained in the first part of this report. Later on, the report will outline problems which occur in Professor Porter's model. The second part of the report applies Porter's concept to a tourism organisation and analyses its
