

# Mathematics in Our World

## (Patterns and Numbers in Nature and the World)

Most of us have a skewed relationship with math: we hate it for its drudgery or love it for its consistency, but usually we don't have a sense of the whole picture. In truth, mathematics is an art. It's easy to lose sight of the elegance in the midst of technical details, especially when aesthetics, motivation, and simplicity – the core values of mathematics – are absent from typical math courses.

Mathematics is the art of patterns and connections embedded in nature and in our environment.

### Patterns in Nature

Patterns in nature are visible regular forms found in the natural world. The patterns can sometimes be modeled mathematically and they include symmetries, trees, spirals, meanders, waves, foams, tessellations, cracks and stripes.
