**Near-Infrared Spectroscopy in Food Science and Technology** Yukihiro Ozaki, W. Fred McClure, Alfred A. Christy, 2006-10-25 This reference gives food science professionals a working understanding of near infrared spectroscopy NIRS and its role in maximizing food potential It explains the technical aspects of NIRS including basic principles characteristics of the NIR spectra instrumentation sampling techniques and chemometrics The book details applications of NIRS in agricultural and marine products foodstuffs and processed foods engineering and process monitoring and food safety and disease diagnosis Near Infrared Spectroscopy in Food Analysis B. G. Osborne, T. Fearn, 1986 *Developments in Near-Infrared Spectroscopy* Konstantinos Kyprianidis, Jan Skvaril, 2017-03-15 Over the past few decades exciting developments have taken place in the field of near infrared spectroscopy NIRS This has been enabled by the advent of robust Fourier transform interferometers and diode array solutions coupled with complex chemometric methods that can easily be executed using modern microprocessors The present edited volume intends to cover recent developments in NIRS and provide a broad perspective of some of the challenges that characterize the field The volume comprises six chapters overall and covers several sectors The target audience for this book includes engineers practitioners and researchers involved in NIRS system design and utilization in different applications We believe that they will greatly benefit from the timely and accurate information provided in this work Infrared Spectroscopy for Food Quality Analysis and Control Da-Wen Sun, 2009-03-05 Written by an international panel of professional and academic peers the book provides the engineer and technologist working in research development and operations in the food industry with critical and readily accessible information on the art and science of infrared spectroscopy technology The book should also serve as an essential reference source to undergraduate and postgraduate students and researchers in universities and research institutions Infrared IR Spectroscopy deals with the infrared part of the electromagnetic spectrum It measure the absorption of different IR frequencies by a sample positioned in the path of an IR beam Currently infrared spectroscopy is one of the most common spectroscopic techniques used in the food industry With the rapid development in infrared spectroscopic instrumentation software and hardware the application of this technique has expanded into many areas of food research It has become a powerful fast and non destructive tool for food quality analysis and control Infrared Spectroscopy for Food Quality Analysis and Control reflects this rapid technology development The book is divided into two parts Part I addresses principles and instruments including theory data treatment techniques and infrared spectroscopy instruments Part II covers the application of IRS in quality analysis and control for various foods including meat and meat products fish and related products and others Explores this rapidly developing powerful and fast non destructive tool for food quality analysis and control Presented in two Parts Principles and Instruments including theory data treatment techniques and instruments and Application in Quality Analysis and Control for various foods making it valuable for understanding and application Fills a need for a
