Online Language Sexuality Power Intersectional Sociolinguistics:

Language, Sexuality, and Power Erez Levon, Ronald Beline Mendes, 2015-11-30 Language Sexuality and Power Studies in Intersectional Sociolinguistics examines the diversity of sexuality as a social and linguistic phenomenon. Bringing together work on Africa, Asia, Europe, Latin America, North America, and the Middle East, the volume explores how different ideologies of what it means to belong to a nation or culture influence how sexualities are both understood and linguistically expressed in a range of global locales. Contributions to the volume use experiments, discourse analysis, and different types of statistical tests to identify the particular aspects of language, accent, grammar, vocabulary, discourse, and other features that are ideologically associated with sexuality in specific contexts. Combining insights from linguistics, anthropology, sociology, and cultural studies, the essays describe how individuals draw on these culturally specific associations both when evaluating the speech of others and in their everyday presentations of self. Together, the eleven chapters in the collection provide a wide-ranging and multi-method perspective on how language mediates individual desires and larger social structures. They also serve to demonstrate the diverse interconnections between sexuality and other dimensions of lived experience in a variety of previously underexplored national and linguistic settings.

Battlefield Linguistics Scott Burnett, Francesca Vigo, 2025-12-13 This volume addresses the politicization of linguistic features, indexing sexual and gender non-normativity at the phonological, morphological, and discursive levels. In the context of masculinist heteronormative and transphobic backlash around the world, these groundbreaking studies adopt queer, trans, and feminist linguistic perspectives to examine how normativity is resisted and identity is stylized, negotiated, and reproduced in everyday text and talk. Part 1 focuses on self-determination, identification through phonetic and other resources. Part 2 focuses on debates over language reform and change. Part 3 examines the contestation of gender ideology using critical linguistic analytical tools.

Language, Culture, and Society James Stanlaw, Nobuko Adachi, 2025-03-31 Why should we study language? How do the ways in which we communicate define our identities? And how is this all changing in the digital world? Over seven editions, many have turned to *Language, Culture, and Society* for answers to questions like these because of its comprehensive coverage of all critical aspects of linguistic anthropology. This eighth edition carries on the legacy while addressing some of the newer, pressing, and exciting challenges of the twenty-first century, such as issues of language and power, language ideology, linguistic diasporas, as well as online and digital ecosystems. New to this edition are a reconceptualization of how linguistics approaches race, gender, and sexuality with additional chapters and sections on how linguistics benefits archaeology and biological anthropology, as well as considerations of the relationship between language and truth, ethics, and war and politics. It also features enhanced and updated pedagogical features, such as learning objectives, updated resources for continued learning, and cross references to updated encyclopedias of linguistic anthropology.

reports on research carried out as part of the European Union co funded C O N T A C T project which targeted hate speech and hate crime across a number of EU member states It showcases the bearing that discourse analytic research can have on our understanding of this phenomenon that is a growing global cause for concern Although hate speech is often incorporated in legal and policy documents there is no universally accepted definition which in itself warrants research into how hatred is both expressed and perceived The research project synthesises discourse analytic and corpus linguistics techniques and presents its key findings here The focus is especially on online comments posted in reaction to news items that could trigger discrimination as well as on the folk perception of online hate speech as revealed through semi structured interviews with young individuals across the various partner countries

Linguistics Out of the Closet Tyler Everett

Kibbey,2023-11-06 Queer linguistics in its position as both a linguistic science of and for queer folk is inherently agitating to the disciplinary anxiety of a general linguistic science. It represents as all queer science does a disruption of the normative modes of knowledge production and a displacement of academic authority. This collection reconsiders the placement of the queer subject both as the researcher and as the researched within and beyond the discipline and provides an intellectual space for the interdisciplinary and sometimes anti disciplinary linguistic science of gender and sexuality. In three sections it respectively considers the development of hyper speciated queer linguistic subfields the interdisciplinarity of intersectional approaches to queer language and the institution of queer linguistic science both within and beyond the academy. Taken together the essays in this collection confront the scientific and institutional discipline of linguistics from a queer vantage point one which is perhaps inherently interdisciplinary in its formulation
