Tracking Sun Tracking This book details Automatic Solar Tracking Sun Tracking Systems Solar Trackers and Sun Tracker  
Systems An intelligent automatic solar tracker is a device that orients a payload toward the sun Such programmable  
computer based solar tracking device includes principles of solar tracking solar tracking systems as well as microcontroller  
microprocessor and or PC based solar tracking control to orientate solar reflectors solar lenses photovoltaic panels or other  
optical configurations towards the sun Motorized space frames and kinematic systems ensure motion dynamics and employ  
drive technology and gearing principles to steer optical configurations such as mangin parabolic conic or cassegrain solar

solar tracking system renewable energy control automation systems require automatic solar tracking software and solar  
position algorithms to accomplish dynamic motion control with control automation architecture circuit boards and hardware  
On axis sun tracking system such as the altitude azimuth dual axis or multi axis solar tracker systems use a sun tracking  
algorithm or ray tracing sensors or software to ensure the sun s passage through the sky is traced with high precision in  
automated solar tracker applications right through summer solstice solar equinox and winter solstice A high precision sun  
position calculator or sun position algorithm is this an important step in the design and construction of an automatic solar  
tracking system The content of the book is also applicable to communication antenna satellite tracking and moon tracking  
algorithm source code for which links to free download links are provided From sun tracing software perspective the sonnet  
Tracing The Sun has a literal meaning Within the context of sun track and trace this book explains that the sun s daily path  
across the sky is directed by relatively simple principles and if grasped understood then it is relatively easy to trace the sun  
with sun following software Sun position computer software for tracing the sun are available as open source code sources  
that is listed in this book The book also describes the use of satellite tracking software and mechanisms in solar tracking  
applications Ironically there was even a system called sun chaser said to have been a solar positioner system known for  
chasing the sun throughout the day Using solar equations in an electronic circuit for automatic solar tracking is quite simple  
even if you are a novice but mathematical solar equations are over complicated by academic experts and professors in text  
books journal articles and internet websites In terms of solar hobbies scholars students and Hobbyist s looking at solar
