**Internet of Things - Distributed Intelligence at the Edge and Human-Machine Interactions** Ovidiu Vermesan,2022-09-01 This book provides an overview of the next generation Internet of Things IoT ranging from research innovation development priorities to enabling technologies in a global context It is intended as a standalone in a series covering the activities of the Internet of Things European Research Cluster IERC including research technological innovation validation and deployment The following chapters build on the ideas put forward by the European Research Cluster the IoT European Platform Initiative IoT EPI the IoT European Large Scale Pilots Programme and the IoT European Security and Privacy Projects presenting global views and state of the art results regarding the next generation of IoT research innovation development and deployment The IoT and Industrial Internet of Things IIoT are evolving towards the next generation of Tactile IoT IIoT bringing together hyperconnectivity 5G and beyond edge computing Distributed Ledger Technologies DLTs virtual and augmented reality VR AR and artificial intelligence AI transformation Following the wider adoption of consumer IoT the next generation of IoT IIoT innovation for business is driven by industries addressing interoperability issues and providing new end to end security solutions to face continuous threats The advances of AI technology in vision speech recognition natural language processing and dialog are enabling the development of end to end intelligent systems encapsulating multiple technologies delivering services in real time using limited resources These developments are focusing on designing and delivering embedded and hierarchical AI solutions in IoT IIoT edge computing using distributed architectures DLTs platforms and distributed end to end security which provide real time decisions using less data and computational resources while accessing each type of resource in a way that enhances the accuracy and performance of

models in the various IoT IIoT applications. The convergence and combination of IoT AI and other related technologies to derive insights, decisions, and revenue from sensor data provide new business models and sources of monetization. Meanwhile, scalable IoT enabled applications have become part of larger business objectives enabling digital transformation with a focus on new services and applications. Serving the next generation of Tactile IoT IIoT real time use cases over 5G and Network Slicing technology is essential for consumer and industrial applications and support reducing operational costs, increasing efficiency and leveraging additional capabilities for real time autonomous systems. New IoT distributed architectures combined with system level architectures for edge fog computing are evolving IoT platforms including AI and DLTs with embedded intelligence into the hyperconnectivity infrastructure. The next generation of IoT IIoT technologies are highly transformational, enabling innovation at scale and autonomous decision making in various application domains such as healthcare, smart homes, smart buildings, smart cities, energy, agriculture, transportation, and autonomous vehicles, the military, logistics, and supply chain, retail, and wholesale manufacturing, mining, and oil and gas.

### **Building Smart Home**

**Automation Solutions with Home Assistant** Marco Carvalho, 2023-09-15 A step by step guide to building cost effective and complete home automation DIY projects using tools such as Home Assistant, Raspberry Pi, IoT devices, the Tasmota sensor, ESP32, and Grafana. Key Features: Learn by doing using real life practical examples to build your own home automation system. Create, hack, and configure IoT devices through hands on projects to be used with or without Home Assistant. Customize your home automation system using Home Assistant, Node RED, InfluxDB, and Grafana. Purchase of the print or Kindle book includes a free PDF eBook. Book Description: Picture a home where you can adjust the lighting based on the time of day or when movement is detected. In this same home, you can also detect when a door is unexpectedly opened or an alarm is triggered in response to any suspicious activity. Such automated devices form part of a smart home and the exciting part is that this book teaches you how to create and manage these devices all by yourself. This book helps you create your own ecosystem to automate your home using Home Assistant software. You'll begin by understanding the components of a home automation system and learn how to create, hack, and configure them to operate seamlessly. Then you'll set up Home Assistant on a Raspberry Pi to work as a home automation server, build your own IoT sensors based on ESP32, ESP8266, and set up real life automation use cases using hands on examples and projects. The chapters will also guide you in using software tools such as Node RED, InfluxDB, and Grafana to manage, present, and use data collected from your Home Automation devices. Finally, you'll gain insights into new technologies and trends in the home automation space to help you continue with your learning journey. By the end of this book, you'll be able to build your own creative IoT based home automation system using different hardware and software technologies. What you will learn: Understand the fundamental concepts of home automation systems. Set up a home automation system using Home Assistant and Raspberry Pi. Create and configure ESP8266 based sensors to work with Home Assistant. Hack a commercial actuator to work with Home Assistant using Tasmota. Create automations.

customize and use applications with Home Assistant Leverage IoT software tools to take your home automation to the next level Work on hands on projects including LED strip lights and an ESP32 five zone temperature logger Explore home automation FAQs emerging technologies and trends Who this book is for The book is for engineers developers students makers and enthusiasts who are working on or interested in working with electronics and IoT devices embedded systems systems integration computer software and coding to develop their own smart home automation systems Technicians teachers and other professionals who want to learn home automation related technologies will also find this book useful Prior experience of working with Raspberry Pi creating hardware prototypes and software programming will be beneficial

**Smart Home Automation with IoT** Dipankar Saha,2024-06-26 Enable smart homes with IoT open source technologies

**KEY FEATURES** Learn to make your home smarter with IoT and AI at a very low cost Live examples along with code and circuit samples which you can readily use Learn scenario based AI based home automation techniques

**DESCRIPTION** This practical guide Smart Home Automation with IoT shows you how to create a smart home without breaking the bank Instead of relying on expensive closed systems you utilize the power of the Internet of Things IoT with open source software to design a custom smart home experience that perfectly suits your needs This book teaches you to create smart home IoT solutions using Raspberry Pi and microcontrollers like Arduino NodeMCU ESP8266 and ESP32 You will learn to program these microcontrollers control relay modules and use sensors for data collection The guide covers using OpenHAB InfluxDB Mosquitto MQTT Broker and Grafana with Raspberry Pi enabling a unified system without coding It also shows how to connect OpenHAB to Alexa or Google Home for voice commands and automate tasks like lighting Bonus content includes using Raspberry Pi GPIO pins AI based hand gesture and face detection and Docker containers By the end of this book you will be a confident smart home builder equipped with the knowledge and skills to design implement and manage a customized system using open source software

**WHAT YOU WILL LEARN** Learn how to implement smart home solution using open source technologies Learn programming microcontrollers ESP32 ESP8266 Arduino using Arduino IDE to integrate with relays and sensors Learn how to install and set up Raspberry Pi for home automation server Learn how to develop Python programs for AI based automation scenarios

**WHO THIS BOOK IS FOR** This book aims to be a useful guide for IoT enthusiasts engineers and professionals as well as students who want to learn how to DIY smart home automation with IoT

**TABLE OF CONTENTS**

- 1 Introduction to IoT and Home Automation
- 2 Setting up Home Automation Platform on Raspberry Pi
- 3 Using NodeMCU and ESP32 with Relays and Actuators as Control Switch
- 4 Connecting Various Common Sensors using Arduino
- 5 Connect Sensors and Relays with OpenHAB IoT and Voice Chatbots
- 6 Developing Dashboards using Grafana to Monitor Smart Home and IoT Devices
- 7 Get more out of Raspberry Pi

*Smart Environments* Diane J. Cook,Sajal Kumar Das,2005 Intelligent environments are revolutionizing the ways in which people live work and play Such an environment typically called a smart environment is a small specialized world where all kinds of devices work together to make inhabitants lives
