**Global Meets Digital** Vinod Jain,2023-06-02 The world today is at the intersection of two megatrends Globalization and Digitalization a business revolution unfolding in real time Global Meets Digital captures the many nuances of this revolution succinctly including its impact on our lives and business An immediate implication of this

revolution is that the economic principles that underpinned business and strategy for hundreds of years such as diminishing returns to scale and resource scarcity are no longer valid for a large and growing number of products and services. The book will challenge you to think differently not just about digital products but also about physical products. In the global digital world products are of three kinds: physical, digital, and smart machines (products that are both physical and digital and connected to the internet), a distinction missed by most books on strategy and global business. The economics of each kind of products is distinct from that of the others, which has strategic implications for all kinds of businesses, implications such as how to compete and how to create and capture value. With several mini case studies and over 100 company examples, the book covers themes and cutting edge issues like the paradox of globalization, digital disruption, disruptive business models, exponential technologies, Internet of Things, competition in digital markets, winner take all market dynamics, Industry 4.0, how to innovate, strategizing for the New Normal, and value creation and value capture in both B2C and B2B contexts. The book derives its underpinnings from the practice of global and digital business, while theory remains in the background. Intended specifically for an executive professional audience, *Global Meets Digital* should also be of value to business students and professors learning to dip their toes into a digital world.

Vinod Jain is an expert in global and digital strategy, award-winning professor, Fulbright Scholar, and author of an MBA textbook, *Global Strategy*. He taught at the Rutgers Business School Newark and New Brunswick and the Robert H. Smith School of Business, University of Maryland, College Park. At Maryland, he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School's Executive MBA program in China. Since leaving Maryland, he has taught in China, Denmark, Finland, Poland, and India as a visiting or term professor. His opinion pieces have appeared in *The Washington Post*, *The Baltimore Sun*, *Mensa Bulletin*, and *Economic Times* and *Mint India*'s 1 and 2 business dailies, among other media. In the past, he worked as a middle and senior level executive with American and British multinationals. Vinod has a PhD in Strategy and International Business from the University of Maryland, College Park; MS in Management from UCLA; and MS and BS Hons in Statistics from the Indian Statistical Institute, Calcutta.

**Podcast Journalism** David Dowling, 2024-03-19

Runner up 2025 Tankard Book Award Association for Education in Journalism and Mass Communication. Podcasting's stratospheric rise has inspired a new breed of audio reporting. Offering immersive storytelling for a binge listening audience, as well as reaching previously underserved communities, podcasts have become journalism's most rapidly growing digital genre, buoying a beleaguered news industry. Yet many concerns have been raised about this new medium, such as the potential for disinformation, the influence of sponsors on content, the dominance of a few publishers and platforms, and at times questionable adherence to journalistic principles. David O. Dowling critically examines how podcasting and its evolving conventions are transforming reporting and even reshaping journalism's core functions and identity. He considers podcast reporting's most influential achievements as well as its most consequential ethical and journalistic shortcomings, emphasizing

the reciprocal influences between podcasting and traditional and digital journalism Podcasting both as a medium and a business has benefited from the blurring of boundaries separating news from entertainment editorial from advertising and neutrality from subjectivity The same qualities and forces that have allowed podcasting to bypass the limitations of traditional categories expand the space of social and political discourse and provide openings for marginalized voices have also permitted corporations to extend their reach and far right firebrands to increase their influence Equally attentive to the medium's strengths and flaws this is a vital book for all readers interested in how podcasting has changed journalism
