**The Voice Catchers** Joseph Turow, 2021-05-18 Your voice as biometric data and how marketers are using it to manipulate you Only three decades ago it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that people's exact locations could be tracked by those devices We now take both for granted Even just a decade ago the idea that individuals' voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel Yet a new business sector is emerging to do exactly that The first in-depth examination of the voice intelligence industry *The Voice Catchers* exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis Amazon and Google have numerous patents pertaining to voice profiling and even now their smart speakers are extracting and using voice prints for identification and more Customer service centers are already approaching every caller based on what they conclude a caller's voice reveals about that person's emotions sentiments and personality often in real time In fact many scientists believe that a person's weight height age and race not to mention any illnesses they may have can also be identified from the sound of that individual's voice Ultimately not only marketers but also politicians and governments may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective explores its contemporary developments and offers a clarion call for regulating this rising surveillance regime

Biodico's Zero Net Energy Farm Russell Teall (III), Howard Nilsen, Russell Teall (IV), Biodico (Firm), 2019 Media Hot and Cold Nicole Starosielski, 2021-10-04 In Media Hot and Cold Nicole Starosielski examines the cultural dimensions of temperature to theorize the ways heat and cold can be used as a means of communication subjugation and control Diving into the history of thermal media from infrared cameras to thermostats to torture sweatboxes Starosielski explores the many meanings and messages of temperature During the twentieth century heat and cold were broadcast through mass thermal media Today digital thermal media such as bodily air conditioners offer

personalized forms of thermal communication and comfort Although these new media promise to help mitigate the uneven effects of climate change Starosielski shows how they can operate as a form of biopower by determining who has the ability to control their own thermal environment In this way thermal media can enact thermal violence in ways that reinforce racialized colonial gendered and sexualized hierarchies By outlining how the control of temperature reveals power relations Starosielski offers a framework to better understand the dramatic transformations of hot and cold media in the twenty first century
