**Large Language Model (From Scratch)** Sebastian Raschka, 2024-10-29 Learn how to create, train, and tweak large language models (LLMs) by building one from the ground up. In "Build a Large Language Model from Scratch", bestselling author Sebastian Raschka guides you step by step through creating your own LLM. Each stage is explained with clear text, diagrams, and examples. You'll go from the initial design and creation to pretraining on a general corpus and on to fine tuning for specific tasks. "Build a Large Language Model from Scratch" teaches you how to plan and code all the parts of an LLM. Prepare a dataset suitable for LLM training, fine tune LLMs for text classification, and use your own data. Use human feedback to ensure your LLM follows instructions. Load pretrained weights into an LLM. "Build a Large Language Model from Scratch" takes you inside the AI black box to tinker with the internal systems that power generative AI. As you work through each key stage of LLM creation, you'll develop an in-depth understanding of how LLMs work, their limitations, and their customization methods. Your LLM can be developed on an ordinary laptop and used as your own personal assistant. **About the technology:** Physicist Richard P. Feynman reportedly said, "I don't understand anything I can't build." Based on this same powerful principle, bestselling author Sebastian Raschka guides you step by step as you build a GPT-style LLM that you can run on your laptop. This is an engaging book that covers each stage of the process from planning and coding to training and fine tuning. **About the book:** "Build a Large Language Model From Scratch" is a practical and eminently satisfying hands-on journey into the foundations of generative AI. Without relying on any existing LLM libraries, you'll code a base model, evolve it into a text classifier, and ultimately create a chatbot that can follow your conversational instructions. And you'll really understand it because you built it yourself. **What's inside:** Plan and code an LLM comparable to GPT-2, load pretrained weights, construct a complete training pipeline, fine tune your LLM for text classification, and develop LLMs that follow human instructions. **About the reader:** Readers need intermediate Python skills and some knowledge of machine learning. The LLM you create will run on any modern laptop and can optionally utilize GPUs. **About the author:** Sebastian Raschka, PhD, is an LLM Research Engineer with over a decade of experience in artificial intelligence. His work spans industry and academia, including implementing LLM solutions as a senior engineer at Lightning AI and teaching as a statistics professor at the University of Wisconsin Madison. Sebastian collaborates with Fortune 500 companies on AI solutions and serves on the Open Source Board at University of Wisconsin Madison. He specializes in LLMs and the development of high-performance AI systems with a deep focus on practical, code-driven implementations. He is the author of the bestselling books "Machine Learning with PyTorch" and "Scikit-Learn and Machine Learning Q&A". The technical editor on this book was David Caswell. **Table of Contents:** 1. Diploma Thesis from the year 2006 in the subject Communications Research Studies Enquiries grade 1 University of Weimar language English abstract Reconstruction of real world scenes from a set of multiple images is a topic in Computer Vision and 3D Computer Graphics with many interesting applications There exists a powerful algorithm for shape reconstruction from arbitrary viewpoints called Space Carving However it is computationally expensive and hence can not be used with applications in the field of 3D video or CSCW as well as interactive 3D model creation Attempts have been made to achieve real time framerates using PC cluster systems While these provide enough performance they are also expensive and less flexible Approaches that use GPU hardware acceleration on single workstations achieve interactive framerates for novel view synthesis but do not provide an explicit volumetric representation of the whole scene The proposed approach shows the efforts in developing a GPU hardware accelerated framework for obtaining the volumetric photo hull of a dynamic 3D scene as seen from multiple calibrated cameras High performance is achieved by employing a shape from silhouette technique in

advance to obtain a tight initial volume for Space Carving Also several speed up techniques are presented to increase efficiency Since the entire processing is done on a single PC the framework can be applied to mobile setups enabling a wide range of further applications The approach is explained using programmable vertex and fragment processors with current hardware and compared to highly optimized CPU implementations It is shown that the new approach can outperform the latter by more than one magnitude The downloadable introduction has been written specifically for this offer Its contents are only a subset of the real introductory chapter of the thesis [IEEE Spectrum](#) ,2009 **Mike Meyers' CompTIA A+ Guide to Managing and Troubleshooting PCs, 4th Edition (Exams 220-801 & 220-802)** Mike Meyers,2012-08-22 Essential Skills for a Successful IT Career Written by the leading authority on CompTIA A certification and training this instructive full color guide will help you pass CompTIA A exams 220 801 and 220 802 and become an expert hardware technician Mike Meyers CompTIA A Guide to Managing and Troubleshooting PCs Fourth Edition is completely up to date with the new CompTIA A standards Inside you ll find helpful on the job tips end of chapter practice questions and hundreds of photographs and illustrations Answers and solutions to the end of chapter sections are only available to instructors and are not printed inside the book Learn how to Work with CPUs RAM BIOS settings motherboards power supplies and other PC components Install configure and troubleshoot hard drives Manage input devices and removable media Install upgrade and troubleshoot Windows XP Windows Vista and Windows 7 Troubleshoot all common PC problems Install video and multimedia cards Work with smartphones tablets and other mobile devices Install and configure wired and wireless networks Connect to the Internet Protect your PC and your network Install configure and manage printers Work with virtualization technologies Understand safety and environmental issues Electronic content features Practice exams for 801 802 with hundreds of questions One hour of free video training from Mike Meyers A collection of Mike s latest favorite shareware and freeware PC tools and utilities Adobe Digital Editions free eBook download subject to Adobe s system requirements Each chapter includes Learning objectives Photographs and illustrations Real world examples Try This and Cross Check exercises Key terms highlighted Tech Tips Notes and Warnings Exam Tips End of chapter quizzes and lab projects **Hart's E&P.** ,2008 **Mike Meyers' CompTIA A+ Guide to 801 Managing and Troubleshooting PCs, Fourth Edition (Exam 220-801)** Mike Meyers,2012-12-11 Essential Skills for a Successful IT Career Written by the leading authority on CompTIA A certification and training this instructive full color guide will help you pass CompTIA A exam 220 801 and become an expert PC technician Mike Meyers CompTIA A Guide to 801 Managing and Troubleshooting PCs Fourth Edition is completely up to date with the new CompTIA A standards Inside you ll find helpful on the job tips end of chapter practice questions and hundreds of photographs and illustrations End of chapter solutions and answers are only available to instructors and do not appear in the book Learn how to Work with CPUs RAM BIOS settings motherboards power supplies and other PC components Work with PCs safely using the proper tools Install and configure hard drives Manage input devices and removable media Install video
