*Building Teaching Capacities in Higher Education* Alenoush Saroyan, Mariane Frenay, 2023-07-03 This book is the culmination of three years work by teams from eight institutions in five different European and North American countries. The teams included faculty developers professors and graduate students interested in developing and disseminating a more profound understanding of university level pedagogy. The purpose of the project was first to conceptualize what an internationally appropriate formal academic program for faculty development in higher education might look like taking into account differing national contexts from national standards for faculty development U K and Scandinavia almost universal institutional support North America to virtually no activities France. The intention was to create and nurture a community of practice enriched and informed by a range of expertise and different higher education traditions cultures and languages. To do so the book begins with a section of five case studies that describe current practice in Belgium Canada Denmark France and Switzerland. The second purpose was to define a common curriculum or core course with common foundations for faculty and graduate students based on a distributed learning model. The final section of the book presents a concrete concept map used to define the curriculum and to educational developers with useful tool for furthering their work and explains the rationale for redefining faculty development as educational development. This book offers practitioners around the world a framework and model of educational development that can serve a number of purposes including professional development monitoring and assessment of effectiveness and research as they seek to meet increasing demands for public accountability. For North American readers it offers insight into the vision and aims of the Bologna Process with which they may need to engage to maintain international competitiveness.

*Creating Capacity and Capability: Embracing Advanced Technologies and Innovations for Sustainable Future in Building Education and Practice* Monty Sutrisna, Mostafa Babaeian Jelodar, Regan Potangaroa, Chinthaka Atapattu, Don Amila Sajeevan Samarasinghe, 2025-05-15 This three volume book is the proceeding of the 46th Australasian Universities Building Education Association AUBEA 2023 Conference which brings together papers on construction and built environment education and practice. This particular conference theme Creating Capacity and Capability Embracing Technologies and Innovations for Sustainable Future in Building Education and Practice is closely related to a flagship national research programme funded by the Government of New Zealand known as the CanConstructNZ research programme aiming to balance the capacity and capability in the construction industry and the national pipeline of construction projects. The capacity and capability of our construction industry in fulfilling the construction needs of the whole nation are reflected in the national pipeline of construction projects and have long been recognised as one of the main challenges facing the construction sector. The practices and education of building and construction play an important role in determining the capacity and capability of the construction industry. Within the context of achieving sustainable future and embracing advanced technologies to create capacity and capability in the construction sector various concepts research and

innovative development have emerged and taken place This particular conference theme has facilitated more in depth discourses and discussions on the latest ideas and innovation within the building and construction education and practice not only from the Australasian region but also from the wider international community including the USA the UK Brazil South Africa Nigeria China and Sri Lanka The contents of this book will be of interest to academic researchers industry professionals and policy makers alike
