Transnationalism in Ancient and Medieval Societies Michael C. Howard, 2014-01-10 While scholars have long documented the migration of people in ancient and medieval times they have paid less attention to those who traveled across borders with some regularity This study of early transnational relations explores the routine interaction of people across the boundaries of empires tribal confederacies kingdoms and city states paying particular attention to the role of long distance trade along the Silk Road and maritime trade routes It examines the obstacles voyagers faced including limited travel and communication capabilities relatively poor geographical knowledge and the dangers of a fragmented and shifting political landscape and offers profiles of better known transnational elites such as the Hellenic scholar Herodotus and the Venetian merchant Marco Polo as well lesser known servants merchants and sailors By revealing the important political economic and cultural role cross border trade and travel played in ancient society this work demonstrates that transnationalism is not unique to modern times

The Lives of Objects Maia Kotrosits, 2020-09-07 Our lives are filled with objects ones that we carry with us that define our homes that serve practical purposes and that hold sentimental value When they are broken lost left behind or removed from their context they can feel alien take on a different use or become trash The lives of objects change when our relationships to them change Maia Kotrosits offers a fresh perspective on objects looking beyond physical material to consider how collective

imagination shapes the formation of objects and the experience of reality Bringing a psychoanalytic approach to the analysis of material culture she examines objects of attachment relationships ideas and beliefs that live on in the psyche and illustrates how people across time have anchored value systems to the materiality of life Engaging with classical studies history anthropology and literary gender and queer studies Kotrosits shows how these disciplines address historical knowledge and how an expanded definition of materiality can help us make connections between antiquity and the contemporary world *British Books in Print* ,1970 National Union Catalog ,1970 Includes entries for maps and atlases
