Korea's Platform Empire Seongcheol Kim, Dal Yong Jin, 2024-06-07 *Korea's Platform Empire* explores the evolution of digital platforms in South Korea's media sphere and their global political economic cultural and technological influence. With a focus on Korea in the context of the global platform revolution, the book takes a methodical look at the broader social implications and the impact on cultural production. The authors explore various facets of the media and cultural industries, looking beyond social media to news broadcasting and the music industry, and look at the policy and regulations behind this shifting technological advancement. This book will appeal to students and scholars working on media industries, digital media, platform studies, information and technology studies, Korean and East Asian media studies, and the creative and cultural industries.

Dangerous Technologies Brandaan Huigen, 2025-11-10 *Dangerous Technologies* focuses on the prevalent theft of consumer electronics in post-Apartheid South Africa. Through a material culture perspective, it explores why these objects have commonly been targeted by bandits and subsequently circulated through the criminal underground. The author traces ethnographically how devices travel between various social spheres, delving into the experiences of a range of individuals: from diverse residents who fall victim to criminals, to the bandits who steal electronics for money or drugs, the African migrants who export consignments of stolen electronics to their home countries, the envious residents who buy stolen electronics, and finally the police attempting to grapple with the problem. *Dangerous Technologies* suggests that electronics have widened digital divides between citizens, resulting in underground circuits that seek to violently redistribute enviable electronics to low-income residents who have not been able to formally participate in electronics consumption and use. Due to porous borders, the widespread theft and redistribution of electronics do not only stem from internal inequalities within South African society but also from broader disparities across the African continent. The book furthers knowledge about how and why particularly modern electronics have precipitated violent property crime in democratic South Africa. It is relevant to scholars of social and cultural anthropology, particularly those with an interest in material culture, digital anthropology, and economic and political anthropology, as well as criminologists.
