

NIFT-526 Topic: 3 Vigilance

Abstract: Algorithms to determine characterizations involving the security strategy problem are also the algorithms to solve the characterization problem for the related security strategy. In different settings, a particular set of rules can be used to obtain a characterization of the security strategy.

Abstract: Five child participants, from mixed backgrounds living with a parent with schizophrenia, were recruited to participate in a study of 'dispositive' based thinking using a thinking task questionnaire. Each participant was then interviewed, providing their response to the task. All participants gave the 'dispositive' response. The questionnaire, and the interview, identified that the participants had been in a situation where dispositive thinking was used to explain their parent's schizophrenia. The questionnaire also identified that the participants had been in a situation where dispositive thinking was used to explain their parent's schizophrenia.
