Michelin Fleet Solutions From selling tires to selling kilometers

Case Abstract

Michelin, a worldwide leader in the tire industry, launched in 2000 a comprehensive tire-management solution offer for large European transportation companies, called Michelin Fleet Solutions (MFS). With this new business model, the company ventured into selling kilometers – instead of selling tires. This decision moves the strongly product-driven firm into the new world of services and solutions. The shift is intuitively appealing, and it provides Michelin with an opportunity to differentiate itself in the tire business. After 3 years, however, expansion is far below expectations and profitability is terrible – despite the outside help of a strategy consulting firm. The case presents the decision point in 2003, whereby MFS's future has to be decided. Should Michelin seek to further develop this solution offer, and try to repackage the offer yet another time? Or was it just a passing fad that should be abandoned?

This case investigates the difficulties that industrial groups face when they transition from selling products to providing service. It enables participants to reflect on the following issues: What's industrial groups' rationale for moving towards solutions? What kind of business model reconfiguration does it imply? How does moving to solutions raise multiple challenges throughout the organization (e.g. in terms of sales force management, risk management, channel relationships etc.)?

¹ This case study was written by Christ Remondi, HEC 2000h and PhD Student at HEC, under the supervision of Frédéric Dabace, Director Chair of Social Business/Firms & Poverty and Wolfgang Uhlage, EDP Chair in Marketing/New Business Models in the Energy Industry, both Associate Professors at HEC Paris. The case was written as a basis for class discussion rather than to illustrate either effective or ineffective handling of an administrative situation. We would like to thank Stéphane Mauelle at Michelin for his assistance and support. Some data have been modified for reasons of confidentiality.

Michelin Fleet Solutions As Case Study:

Commodity Marketing Margit Enke, Anja Geigenmüller, Alexander Leischnig, 2022-04-22 Commoditization is a major challenge for companies in a wide range of industries and commodity marketing has become a priority for many top managers. This book tackles the key issues associated with the marketing of commodities and the processes of commoditization and de-commoditization. It summarizes the state of the art on commodity marketing, providing an overview of current debates. It also offers managerial insights, case studies, and guidance to help manage and market commodity goods and services.

Strategy Implementation Kurt Verweire, 2014-04-24 Strategy implementation or strategy execution is a hot topic today. Managers spend significant resources on consulting and training in the hope of creating brilliant strategies, but all too often brilliant strategies do not translate into brilliant performance. This book presents new conceptual models and tools that can be used to implement different strategies. The author analyses how market leaders have benefitted from successful strategy implementation and provides the reader with a comprehensive and systematic framework to tackle strategy implementation challenges. Have clear strategic choices been made? Are actions aligned with the strategy? What's the organizational context for the strategy? In answering these simple questions, the book provides students of strategic management along with managers involved in designing and implementing strategies with a valuable resource.

XaaS: Everything-as-a-service - The Lean And Agile Approach To Business Growth Shantanu Bhattacharya, Lipika Bhattacharya, 2021-10-13 XaaS Everything as a Service The Lean and Agile Approach to Business Growth takes the reader into the bold new world of pay per use for a product or service. From the perspective of the customer, the servitization model yields multiple benefits: the consumer can try out the product/service at a relatively low cost, the risk is mitigated, capital expenses can be converted into operating expenses, it is not needed to forecast how often the product/service is used, and only parts of the product/service needed can be used. Similarly, a provider can benefit by having a larger market coverage, a steadier stream of revenues, upgrades as and when needed, sharing of fixed assets across consumers, practicing of value-based pricing, and unbundling or bundling utility for consumers using appropriate pricing techniques. However, this nanoization of products/services is tricky and has to be designed carefully. This book provides a set of recipes to providers to adopt the XaaS model by changing the provider's mindset: dividing the product/service forces the provider to take a value-driven approach to his product/service and consequently eliminate all non-value-added activities. The requirements of the XaaS model serve both as an objective to the innovation and internal processes of the provider and as a guide to understanding the customer's needs. The book also covers data acquisition, data analysis, and synthesis, and data application needs of the XaaS model with simple examples and case studies from the business world of firms that achieve these objectives successfully.
