**Non-Additive Measure and Integral** D. Denneberg, 2013-03-09 Non Additive Measure and Integral is the first systematic approach to the subject Much of the additive theory convergence theorems Lebesgue spaces representation theorems is generalized at least for submodular measures which are characterized by having a subadditive integral The theory is of interest for applications to economic decision theory decisions under risk and uncertainty to statistics including belief functions fuzzy measures to cooperative game theory artificial intelligence insurance etc Non Additive Measure and Integral collects the results of scattered and often isolated approaches to non additive measures and their integrals which originate in pure mathematics potential theory statistics game theory economic decision theory and other fields of application It unifies simplifies and generalizes known results and supplements the theory with new results thus providing a sound basis for applications and further research in this growing field of increasing interest It also contains fundamental results of sigma additive and finitely additive measure and integration theory and sheds new light on additive theory Non Additive Measure and Integral employs distribution functions and quantile functions as basis tools thus remaining close to the familiar language of probability theory In addition to serving as an important reference the book can be used as a mathematics textbook for graduate courses or seminars containing many exercises to support or supplement the text

**Non-Additive Measure and Integral** D. Denneberg, 2014-01-15      **Non-additive Measure and Integral** Dieter Denneberg, 1997      **Non-Additive Measures** Vicenc Torra, Yasuo Narukawa, Michio Sugeno, 2013-10-23 This book provides a comprehensive and timely report in the area of non additive measures and integrals It is based on a panel session on fuzzy measures fuzzy integrals and aggregation operators held during the 9th International Conference on Modeling Decisions for Artificial Intelligence MDAI 2012 in Girona Spain November 21 23 2012 The book complements the MDAI 2012 proceedings book published in Lecture Notes in Computer Science LNCS in 2012 The individual chapters written by key researchers in the field cover fundamental concepts and important definitions e g the Sugeno integral definition of entropy for non additive measures as well some important applications e g to economics and game theory of non additive measures and integrals The book addresses students researchers and practitioners working at the forefront of their field      **Lectures on non-additive measure and integral** Dieter Denneberg, 1992      *Handbook of Fuzzy Computation* E Ruspini, P Bonissone, W

Pedrycz, 2020-03-05 Initially conceived as a methodology for the representation and manipulation of imprecise and vague information fuzzy computation has found wide use in problems that fall well beyond its originally intended scope of application Many scientists and engineers now use the paradigms of fuzzy computation to tackle problems that are either intractable      Actuarial Science: Theory And Methodology Hanji Shang, 2006-06-29 Since actuarial education was introduced into China in the 1980s Chinese scholars have paid greater attention to the theoretical research of actuarial science Professors and industry experts from well known universities in China recently worked together on the project

Insurance Information Processing and Actuarial Mathematics Theory and Methodology which was supported by the Chinese government Summarizing what they achieved this volume provides a study of some basic problems of actuarial science including risk models risk evaluation and analysis and premium principles The contributions cover some new applications of probability and statistics fuzzy mathematics and financial economics to the field of actuarial practices Discussions on the new insurance market in China are also presented

Fuzzy Measures and Integrals Michel Grabisch,Toshiaki Murofushi,Michio Sugeno,2000-01-24 Concepts similar to fuzzy measure have been introduced independently in many domains in non expected utility theory cooperative game theory complexity analysis measure theory etc This book reflects all these facets It gathers survey papers written by leading researchers in the field covering a selection of most significant topics The first part is devoted to fundamental and theoretical material while the second part deals with more applied topics such as decision making and pattern recognition The book is of interest to researchers in decision making artificial intelligence applied mathematics mathematical social sciences etc
