Staying Safe while Surfing

The internet is an amazing resource where we can learn, play, and have fun! However, it's important to ensure our safety while using it. This report will provide you with some important medical advice to help you stay safe online, just like real-life examples of children who didn't follow these procedures.

1. Always seek consent

Before entering the internet, it's essential to ask your parents, guardians, or teachers for permission. They will be your online healthcare providers and will guide you to websites and apps suitable for your age. For instance, Emily, an 11-year-old girl, was excited to explore the internet without permission and accidentally ended up on an inappropriate site that made her feel scared and uncomfortable.

2. Keep personal information confidential

Remember, just like how we keep private medical information safe, your personal details should remain private and not be shared online. Never disclose your full name, home address, phone number, or school name to anyone you don't know in real life. Ryan, an 8-year-old boy, once shared his address with someone he met while gaming online, and a stranger showed up at his doorstep, causing distress for his family.

3. Be cautious with strangers

Never be tempted to accept or provide personal information to anyone you don't know online. Always think twice before clicking on links or downloading files from unknown sources. For example, a boy named Alex was approached by a stranger who offered him a reward for completing a task. Alex, being curious, agreed but later found out it was a scam.
