Non Ionic Surfactants Chemical Engineering Methods And Technology:

Non-Ionic Surfactants Pierce L. Wendt, 2014-05-14 *Nonionic Surfactants* Dieter Balzer, Harald Luders, 2000-07-12 This volume provides a comprehensive overview for recognizing and producing the characteristics of successful special surfactant agents. It highlights one of the most versatile and effective surface active surfactant agents detailing the synthesis and production, chemical properties and behaviours, and application for alkyl polyglucosides. *Non-ionic Surfactants* Pierce L. Wendt, Demario S. Hoysted, 2010 Non ionic surfactants are chemically potent molecular species that are becoming increasingly important as an excipient component used in the formulation and delivery of drugs and vaccines. These chemicals do not have charge in their predominant working range of pH yet interact strongly with high energy structures such as interfacial regions, phase boundaries and surfaces and can cause dramatic changes in crucial properties of molecular mixtures including solubility, dispersion, uniformity, viscosity, miscibility, phase and transport. Non ionic surfactants are used extensively in the chemical industry in such areas as detergents, health and personal care, coatings and polymers. Furthermore, non ionic surfactants or surface active wetting agents reduce the surface tension of water, allowing the water molecules to spread out. When applied to water repellent soils in high concentrations, surfactants can improve the ability of the water to penetrate the soil surface and thus increase the infiltration rate. This new book gathers the latest research from around the globe in this field. *Nonionic Surfactants* Nico M. van Os, 2017-10-19 Discusses the laboratory and industrial synthesis of nonionic surfactants. Furnishes exhaustive coverage of the most recent advances in nonionic surfactant organic chemistry. Analyzes a novel class of catalysts for the production of surfactants with highly narrow distributions. *Novel Processing Methods for Plant-Based Health Foods* Megh R. Goyal, N. Veena, Ritesh B. Watharkar, 2023-03-10 This new volume presents an array of new and emerging techniques in the food processing sector focusing on the extraction, encapsulation and health benefits of bioactive compounds. It illustrates various applications of novel food processing extraction and encapsulation techniques along with the health and safety aspects of plant derived bioactive compounds and functional foods. Some of the sustainable and green extraction techniques discussed include novel extraction techniques such as microwave assisted extraction, MAE, ultrasonic assisted extraction, UAE, supercritical fluid extraction, SFE, accelerated solvent extraction, ASE and rapid solid liquid extraction, RSLE. The volume also covers the principles and methods of encapsulation, its role and application in protection and stabilization and as a targeted delivery system for enhanced nutritional health benefits. Various encapsulation methods such as spray drying, spray cooling, chilling, fluidized bed coating, coacervation, liposome entrapment, extrusion, inclusion, complexation etc are discussed in detail for application in the food industry. *Novel Processing Methods for Plant Based Health Foods: Extraction, Encapsulation and Health Benefits of Bioactive Compounds* also highlights the potential of nutraceuticals and biological active compounds in human health, various sources, consumers acceptance, safety aspects and their application in development of functional foods. This volume offers many tremendous applications in different areas of

the food industry including in food processing preservation health promoting properties and safety and quality evaluation of plant based foods The book provides a wealth of information and will be an excellent reference material for researchers scientists students growers traders processors industry professionals and others on the emerging food processing approaches for extraction and encapsulation of plant based bioactive compounds and health promoting properties of plant derived nutraceuticals and safety aspects in production of functional foods Enhanced Oil Recovery Ajay Mandal,Keka Ojha,2023-11-29 Oil recovery efficiency can be increased by applying the enhanced oil recovery EOR processes which are based on the improvement of mobility ratio reduction of interfacial tension between oil and water wettability alteration reduction of oil viscosity formation of oil banks and so forth This book describes the different EOR methods and their mechanisms which are traditionally used after conventional primary and secondary processes The present scenario of different EOR processes at both the field application stage and research stage is also covered Further it discusses some of the recent advances in EOR processes such as low salinity water flooding the application of nanotechnology in EOR microbial EOR carbonated water injection etc Features Comprehensive coverage of all enhanced oil recovery EOR methods Discussion of reservoir rock and fluid characteristics Illustration of steps in design and field implementation as well as the screening criteria for process selection Coverage of novel topics of nanotechnology in EOR and hybrid EOR method and low salinity waterfloods Emphasis on recent technologies feasibility and implementation of hybrid technologies This book is aimed at graduate students professionals researchers chemists and personnel involved in petroleum engineering chemical engineering surfactant manufacturing polymer manufacturing oil gas service companies and carbon capture and utilization Chemistry and Industry ,1986 Advances in Environmental Technologies Ji Zhao,Reza Iranpour,Xin Yong Li,Bo Jin,2013-08-16 Selected peer reviewed papers from the 2013 2nd International Conference on Energy and Environmental Protection ICEEP 2013 April 19 21 2013 Guilin China Ionic Liquid-Based Technologies for Environmental Sustainability Mohammad Jawaid,Akil Ahmad,A.
