Nonverbal Learning Disabilities The Syndrome And The Model:

Nonverbal Learning Disabilities Byron Patrick Rourke, 1989-05-05 NONVERBAL LEARNING DISABILITIES systematically identifies, describes, and explains the elements and dynamics of the nonverbal learning disabilities NLD syndrome including its neuropsychological, academic, and socioemotional adaptational aspects. In addition, this groundbreaking work explores the ramifications of the NLD syndrome for both the theoretical and applied aspects of the neuropsychology of learning disabilities in particular and for the field of child clinical neuropsychology in general.

Nonverbal Learning Disabilities in Children John M. Davis, Jessica Broitman, 2011-05-04 Although it has yet to be recognized by the American Psychiatric Association's Diagnostic and Statistical Manual DSM, nonverbal learning disabilities NVLD in children are a growing concern. NVLD are receiving increased attention from researchers as well as from clinicians encountering these conditions in their young clients. At the same time, reliable information on effective interventions for NVLD has lagged behind this interest. *Nonverbal Learning Disabilities in Children: Bridging the Gap Between Science and Practice* offers a well-rounded understanding of NVLD, placing it within the context of other developmental disorders, most notably high-functioning autism and Asperger's syndrome. The most current genetic, environmental, and neurobiological theories of and research into the causes of NVLD (e.g., the white matter model) in depth, diagnostic methods and quality interventions are examined. Using an evidence-based approach, this groundbreaking volume conceptualizes NVLD as a disorder with subtypes, differentiates between diagnostic criteria for NVLD and Asperger's Syndrome, analyzes the co-occurrence of NVLD with other developmental disabilities and psychological disorders, provides a comprehensive psychoeducational assessment model, describes efficacious treatments and supports their empirical validation. Offers guidelines for sustaining treatment gains through effective collaboration of school personnel and family members. *Nonverbal Learning Disabilities in Children* is a must-have reference for researchers, practitioners, and graduate students in school and clinical child psychology, education, speech language therapy, and other disciplines and professions involved in identifying and treating children with NVLD.

Nonverbal Learning Disabilities at School Pamela Tanguay, 2001-10-01 Topics such as finding the right school curriculum modifications and social and emotional issues experienced by children with NLD are covered. The bulk of the book outlines specific teaching strategies from how to deal with essay questions to tips on helping the student master long division and ideas for improving reading comprehension.

NVLD and Developmental Visual-Spatial Disorder in Children Jessica Broitman, Miranda Melcher, Amy Margolis, John M. Davis, 2020-10-17 This unique volume explores issues related to working with children who have nonverbal learning disability NVLD. It examines how a child's psychology, thoughts, feelings, beliefs, and affects his or her functioning and learning. In addition, the book addresses how a child's experiences are processed through individual personality, psychology, culture, environment, and economic circumstances, and family dynamics. Using these psychological organizing principles, the book describes how to work most effectively with young

patients with NVLD It offers a new model and definition for understanding NVLD emphasizing its core deficit of visual spatial processing In addition this book addresses efforts to rename NVLD to developmental visual spatial disorder DVSD It describes the 11 possible subtypes as including a primary deficit in visual spatial processes and impairment in several additional functional domains including executive functioning social emotional deficits academic achievement and motor coordination The book highlights the need for psychologically minded treatment and provides specific intervention guidelines It details how to conduct the intake process and create a treatment plan and team and offers practical suggestions for working with a patient s family members In addition the book addresses the importance of working with a consistent psychological theory such as control mastery theory CMT It describes the Brooklyn Learning Center Model for treating NVLD and offers guidelines for interventions to support patients academically The book provides a comprehensive approach to the neuropsychological assessment of NVLD as well as examples of visual spatial sensory perception executive functioning academics social emotional deficits and motor coordination interventions and all forms used to gather information from patients Key areas of coverage include Definition of nonverbal learning disability NVLD Efforts toward inclusion in the Diagnostic and Statistical Manual DSM and for renaming it to a developmental visual spatial disorder DVSD Guide to general diagnostic testing and assessment Developing a treatment plan and team for NVLD patients NVLD therapy and tutoring priorities NVLD and Developmental Visual Spatial Disorder in Children is an essential reference for clinicians therapists and other professionals as well as researchers professors and graduate students in school and clinical child psychology special education speech language therapy developmental psychology pediatrics social work as well as all interrelated disciplines

Syndrome of Nonverbal Learning Disabilities Byron P. Rourke, 1995-06-23 The syndrome of nonverbal learning disabilities NLD is a subtype of learning disabilities whose neuropsychological assets and deficits have predictable academic and psychosocial outcomes Developed by Byron P Rourke and elucidated in his previous work the white matter model was designed to encompass the complex manifestations and neurophysiological underpinnings of the NLD syndrome Now for the first time evidence that bears upon the white matter model has been gathered into a single volume Building upon Rourke s previous work on NLD Syndrome of Nonverbal Learning Disabilities Neurodevelopmental Manifestations further explores the ramifications of NLD in the neuropsychology of learning disabilities and in pediatric neurological disease disorder and dysfunction Following an overview of the white matter model chapters cover a wide range of pediatric neurological diseases and disorders through which the model is examined with particular attention to its neurophysiological aspects The diseases and disorders discussed include callosal agenesis Asperger syndrome velocardiofacial syndrome Williams syndrome de Lange syndrome early hydrocephalus Sotos syndrome congenital hypothyroidism acute lymphocytic leukemia metachromatic leukodystrophy Turner syndrome fetal alcohol syndrome multiple sclerosis traumatic brain injury and toxicant induced encephalopathy Dimensions relevant to both assessment and treatment are raised throughout the work as are suggestions

for future research Recommended for neuropsychologists neurologists psychologists psychiatrists and pediatricians treating children with learning disabilities or with pediatric neurological disease disorder and dysfunction Syndrome of Nonverbal Learning Disabilities serves both as an authoritative update on recent advances and as a text for advanced courses in child developmental neuropsychology pediatric neurology and learning disabilities *Handbook of Pediatric Neuropsychology*

Nonverbal Learning Disabilities at School Pamela B. Tanguay, 2002 **Frames of Reference for the Assessment of Learning Disabilities** G. Reid Lyon, 1994 Researchers and educators are well aware of the pressing need for guidelines in measuring learning disabilities and of the difficulty in finding a resource that offers in depth analysis of assessment issues Frames of Reference for the Assessment of Learning Disabilities provides a comprehensive discussion of up to date research and progressive measurement strategies Unique because of its broad scope this essential reference examines assessment tools as they relate to a wide range of learning disabilities including disabilities that affect attention executive function linguistics and reading mathematics written language expression spelling social competence and cognitive abilities It also

establishes a framework for systematic measurement by identifying five decision points that enable the evaluator to focus on the learning areas that are most crucial and most difficult for the student to master This groundbreaking work compiled by recognized experts challenges the traditional definition of learning disabilities and explores new approaches to measuring a child's progress reliably It enables professionals to evaluate measurement tools and strategies to develop criteria for choosing and evaluating core test batteries and to assess the efficacy of improving existing tools versus developing new ones Researchers clinicians educators and students in special education psychology neurology and pediatrics can turn to this resource for an authoritative examination of the issues surrounding the assessment of learning disabilities and for state of the art measurement techniques *Localization of Brain Lesions and Developmental Functions* Daria Riva, Arthur Lester Benton, 2000 The study of neuropsychological functions in children has lately undergone a considerable evolution most obviously represented by the evidence that cerebral areas of the child's brain are specialised at a very early stage Such evidence has been derived from a number of anatomical physiological and clinical studies This book examines and defines the pictures of any deficient function or of several in relation to lesions of different cerebral areas thereby indirectly demonstrating the role of these areas in neuropsychological development *Developmental Psychopathology, Theory and Methods* Dante Cicchetti, Donald J. Cohen, 1995-05 The first of two complementary volumes on developmental psychopathology a new perspective on mental illness that ties mental disorder to normal development Developmental psychopathology is sufficiently different from older views of mental dysfunction as to be growing as a separate subdiscipline of psychology psychiatry This volume covers the history theory and methods of this new approach including the contributions of several standard theoretical viewpoints psychoanalytic system theory organizational information processing cross cultural etc examines the relationship between developmental psychopathology and genetics neuropsychology epidemiology and ethology and looks at the implications for psychometric theory *Perspectives on Dyslexia, Neurology, Neuropsychology and Genetics* George Pavlidis, 1990 This is a consideration of the latest research into dyslexia Many advances have been made in the last few years towards understanding the major psychological and neurological components of dyslexia Such advances include the areas of genetics subtypes phonology computerized EEG brain mapping evoked potentials eye movements blood flow and PET scans *Raising NLD Superstars* Marcia Brown Rubinstien, 2005-01 Raising NLD Superstars is essential reading for all those who come in to contact with children with non verbal learning disorders NLD Instead of insisting upon the one size fits all model of intervention the author focuses on the individual nature of NLD children and offers practical adaptable advice that will help them find their place both in the family and in wider social groups The author shares her experiences of life as the parent of a child with NLD with humanity and humor She looks not only at day to day practicalities such as making meal times easier for all the family and reaching compromises on inappropriate clothing choices but also at the long term plan for independence The book will help parents and carers to support children with NLD to reach their

emotional and cognitive potential while taking into account the views and experiences of other family members
