**Posthuman Ethics** Patricia MacCormack, 2016-04-08 Posthuman theory asks in various ways what it means to be human in a time when philosophy has become suspicious of claims about human subjectivity Those subjects who were historically considered aberrant and our future lives becoming increasingly hybrid show we have always been and are continuously transforming into posthumans What are the ethical considerations of thinking the posthuman Posthuman Ethics asks not what the posthuman is but how posthuman theory creates new imaginative ways of understanding relations between lives Ethics is a practice of activist adaptive and creative interaction which avoids claims of overarching moral structures Inherent in thinking posthuman ethics is the status of bodies as the site of lives inextricable from philosophy thought experiments in being and fantasies of the future Posthuman Ethics explores certain kinds of bodies to think new relations that offer liberty and a contemplation of the practices of power which have been exerted upon bodies The tattooed and modified body the body made ecstatic through art the body of the animal as a strategy for abolitionist animal rights the monstrous body from teratology to fabulations queer bodies becoming angelic the bodies of the nation of the dead and the radical ways in which we might contemplate human extinction are the bodies which populate this book creating joyous political tactics toward posthuman ethics

Making Monsters: A Speculative and Classical Anthology Djibril al-Ayad, Emma Bridges, 2018-06-04 We have always made monsters in art in myth in religion out of clay or bronze pixels or hybrid flesh from the stuff of human nightmares by cursing women with bestial traits This anthology brings together fiction and accessible academic writing in conversation about monsters and their roles in our lives and ours in theirs

**Spontaneous Objects** Rebecca Zorach, 2026-02-17 In the late medieval and early modern periods European artists theorists and natural philosophers imagined Nature not simply as a force of reproduction but as an artist in its own right a creative power capable of generating images artifacts and objects of beauty Tracing this idea from the fifteenth through early nineteenth centuries Rebecca Zorach challenges assumptions about human artistic genius and intention that have long dominated histories of art and science With inspiration from new materialist theory Zorach reclaims a largely disregarded undercurrent of historical thought about the powers of nature Through case studies ranging from Renaissance centaurs and snails to Adam Smith's beaver hat and Kant's travelers tales Zorach investigates how ideas about nature's generative power unsettled conventional definitions of image

artifact and artistic intention At the same time Zorach also confronts the violent legacies of a different vision of nature s power as European empires expanded emerging natural philosophies contributed to global colonial imaginaries and racial hierarchies reframing nature as a force to be classified controlled and exploited In seeking to understand whether and how these views of nature cohere Zorach excavates how the historical formation of the human and the natural depends on ideas about artistic production and artistic intention A significant contribution to art history visual culture and environmental humanities Spontaneous Objects will engage scholars interested in the intersections of art science theology and colonial modernity He that Will Not when He May Mrs. Oliphant (Margaret),1881 **Old Words and Modern Meanings**
