Government Reports Announcements & Index ,1995      **Gains horaires, durée du travail** Statistical Office of the European Communities,1982      Fermented Meats Geoffrey Campbell-Platt,2013-04-17 Preservation by fermentation is one of the oldest food technologies and yet it continues to play an important role in meat preservation in many parts of the world These processes can be relatively simple with minimal microbial involvement or more complex involving defined ingredients and starter cultures with controlled environmental conditions Most meat fermentations rely on the use of salt as an ingredient sometimes with the addition of nitrate nitrite and spices In some cases the meat may be smoked and as with some cheese fermentations fermented meats may be ripened by moulds and yeasts The preservation of meats by fermentation depends on the interaction of a number of environmental and microbio logical factors including the pH water activity redox potential and the presence of preservatives and a competitive microftora The subject of fermented meats is an important but relatively specialised area of microbiology and food technology Few books have specifically addressed this subject and the topic has usually been dealt with in reviews and research papers with a significant proportion of these being published in languages other than English As far as we are aware this volume is the first to bring together a selection of key topics relating to the production of fermented meats and their chemical and microbiological properties The book begins with a general chapter on the properties of meat      Government reports annual index ,199?      Energy Research Abstracts ,1984 Semiannual with semiannual and annual indexes References to all scientific and technical literature coming from DOE its laboratories energy centers and contractors Includes all works deriving from DOE other related government sponsored
