## Noelles Rock 2 Volume 2:

[Mathematical Models in the Biosciences II](#) Michael Frame, 2021-10-12 Volume Two of an award winning professor's introduction to essential concepts of calculus and mathematical modeling for students in the biosciences. This is the second of a two part series exploring essential concepts of calculus in the context of biological systems. Building on the essential ideas and theories of basic calculus taught in Mathematical Models in the Biosciences I this book focuses on epidemiological models mathematical foundations of virus and antiviral dynamics ion channel models and cardiac arrhythmias vector calculus and applications and evolutionary models of disease. It also develops differential equations and stochastic models of many biomedical processes as well as virus dynamics the Clancy Rudy model to determine the genetic basis of cardiac arrhythmias and a sketch of some systems biology. Based on the author's calculus class at Yale the book makes concepts of calculus less abstract and more relatable for science majors and premedical students.

*Breaking My Silence* Carmen Richter, Fear silenced me. Love helped me speak my truth. Three weeks before my sixteenth birthday I was sexually assaulted by three of the most popular boys in my school. They threatened to kill me if I ever said a word. For two years I kept my head down and my mouth shut. And then Ian happened. When the new running back from out of town asked me to tutor him something made me say yes. Even though all of my survival instincts were screaming at me to run something about him made me feel safe. Safe enough to trust him with my truth. But when the people who had ruined my life found out I'd broken my silence Ian and I found ourselves playing a dangerous game we didn't know the rules to with people who would stop at nothing to duck the consequences of their actions. See author's website for content and trigger warning.

**Under My Skin** Carmen Richter, Dating him was just an act so why was he getting under my skin. After the untimely death of my sister I was left with custody of her newborn son. Despite trying my best I was barely able to care for myself much less an infant. Things were looking bleak until the opportunity of a lifetime fell into my lap courtesy of my bestie. She told me about a friend of hers a pro football player who was looking for someone to pose as his girlfriend to help restore his public image and that he was willing to pay generously for their time. It almost sounded too good to be true. In a way it was because the man offering the help I so desperately needed was none other than my nephew's father Braden Hicks. The one person in the world I truly despised. See author's website for full content and trigger warning.

[Australian Books in Print](#), 1992 **Mathematical Models in the Biosciences I** Michael Frame, 2021-06-22 An award winning professor's introduction to essential concepts of calculus and mathematical modeling for students in the biosciences. This is the first of a two part series exploring essential concepts of calculus in the context of biological systems. Michael Frame covers essential ideas and theories of basic calculus and probability while providing examples of how they apply to subjects like chemotherapy and tumor growth chemical diffusion allometric scaling predator prey relations and nerve impulses. Based on the author's calculus class at Yale University the book makes concepts of calculus more relatable for science majors and premedical students.
