While there has been a discourse on the topic in some jurisdictions such as Delaware USA, it has not received scholarly treatment at an international level. This Research Handbook seeks to alter that and signifies the first endeavor to engage in a comprehensive and comparative analysis of shareholder inspection.

*Practical Gastrointestinal Pathology* Hanlin L. Wang, Zongming Eric Chen, 2020-12-05  
This book addresses practical issues that reflect the current landscape of GI pathology practice and is organized in such a way that fits the fast-paced daily life of practicing pathologists. It contains more

than 540 questions that address difficult prevailing and controversial issues in GI pathology that are frequently encountered in daily practice and consult service. For most questions answers are straightforward with ample literature support. However, true diagnostic controversies and clinical dilemma cannot be easily resolved with current knowledge and available information. To such challenges an expert approach regarding how to synthesize complicated topics and clearly communicate the thinking process is valuable to readers and can help guide clinicians making optimal treatment plans for their patients. The latter types of answers are highly enriched throughout the book. Distinct from other existing GI pathology textbooks, this book is primarily organized according to disease entities and pathological processes instead of specific organs and anatomic locations. Guided by chapter titles and listed questions, readers should be able to look up a disease or a pathological feature and find the most important and relevant diagnostic criteria and pertinent differential diagnoses. Written by experts in the field, *Practical Gastrointestinal Pathology* provides easy and quick access to concise evidence-based and up-to-date information to aid accurate diagnosis and serves as a useful resource for practicing pathologists, pathology trainees, and GI clinicians as well as allied health professionals who frequently deal with GI pathology.
