Ordinary Enchantments Ordinary Enchantments:

Ordinary Enchantments Wendy B. Faris, 2004 Ordinary Enchantments investigates magical realism as the most important trend in contemporary international fiction defines its characteristics and narrative techniques and proposes a new theory to explain its significance In the most comprehensive critical treatment of this literary mode to date Wendy B Faris discusses a rich array of examples from magical realist novels around the world including the work not only of Latin American writers like Gabriel Garcia Marquez but also of authors like Salman Rushdie Gunter Grass Toni Morrison and Ben Okri Faris argues that by combining realistic representation with fantastic elements so that the marvelous seems to grow organically out of the ordinary magical realism destabilizes the dominant form of realism based on empirical definitions of reality gives it visionary power and thus constitutes what might be called a remystification of narrative in the West Noting the radical narrative heterogeneity of magical realism the author compares its cultural role to that of traditional shamanic performance which joins the worlds of daily life and that of the spirits Because of that capacity to bridge different worlds magical realism has served as an effective decolonizing agent providing the ground for marginal voices submerged traditions and emergent literatures to develop and create masterpieces At the same time this process is not limited to postcolonial situations but constitutes a global trend that replenishes realism from within In addition to describing what many consider to be the progressive cultural work of magical realism Faris also confronts the recent accusation that magical realism and its study as a global phenomenon can be seen as a form of commodification and an imposition of cultural homogeneity And finally drawing on the narrative innovations and cultural scenarios that magical realism enacts she extends those principles toward issues of gender and the possibility of a female element within magical realism

Magical Feminism in the Americas:

Resisting Female Marginalisation and Oppression through Magic Abu Shahid Abdullah, 2025-01-07 The book aims to show the way magical feminism resists female marginalisation and oppression in the Americas Dealing with multiple victimisation of women in the Americas who have suffered not only because of their gender but also their race ethnicity political ideology social status financial insecurity and such magical feminism provides a voice to them so that they can speak about their marginalisation and victimisation In other words by using magical feminism these female authors attempt to give a voice to the oppressed women enabling them to resist and challenge the traditional female role and to raise their voices against various social and political issues The subversive and transgressive power of magical feminism enables the oppressed women to break patriarchal constraints and to reverse the traditional power structure By creating an imaginary realm through traditions local beliefs and rituals myth magic and the spirits of the dead ancestors as guides magical feminist technique functions as a survival strategy for women in traumatic and oppressive situations and provides them consolation The project includes a total of eight novels from African American Gloria Naylor's *Mama Day* Latin American Isabel Allende's *The House of the Spirits* Native American Louise Erdrich's *Tracks* Chicana Ana Castillo's *So Far from God* North American
