

Structure of the Microcirculation and Capillary System

The microcirculation of each organ is organized specifically to serve that organ's needs. In general, each nutrient artery entering an organ branches six to eight times before the arteries become small enough to be called arterioles, which generally have internal diameters of only 10 to 15 micrometres . Then the arterioles themselves branch two to five times, reaching diameters of 5 to 9 micrometres at their ends where they supply blood to the capillaries.

The arterioles are highly muscular, and their diameters can change many fold. The **metarterioles (the terminal arterioles)** do not have a continuous muscular coat, but smooth muscle fibres encircle the vessel at intermittent points, as shown in Figure by the black dots on the sides of the metarteriole.

Microcirculation in Organ Transplantation M. D. Menger, W. Land, K. Messmer, 1995-06-07 Mechanisms of Sepsis-Induced Organ Dysfunction and Recovery E. Abraham, Mervyn Singer, 2006-10-11 There have been tremendous advances in understanding the cellular mechanisms involved in sepsis and contributing to the development of multiple organ dysfunction and mortality in this setting The chapters in this book provide up to date insights into important pathways that are initiated by sepsis Sepsis and Organ Dysfunction A.E. Baue, G. Berlot, A. Gullo, J.-L. Vincent, 2013-04-17 An experienced physician knows how to recognize a patient suffering from sepsis but cannot accurately determine whether the patient will survive Cardinal elements of the treatment for sepsis include specific antibiotic and vasoactive drugs enteral and parenteral nutrition artificial respiration and optimization of the oxygen transport to tissues Nonetheless with a certain frequency these techniques are insufficient to ensure the recovery of a critically ill patient especially when it is necessary to overcome functional alterations subsequent to organ and vital system overload The key elements in the progression of the

sepsis MODS syndrome are tied to numerous factors These include the severity and location of the lesion the patient's age the remaining functional reserve the presence of mediators which may be stimulatory inhibitory or both

The Physiology and Pharmacology of the Microcirculation Nicholas A. Mortillaro, 2013-10-22 The Physiology and Pharmacology of the Microcirculation Volume 2 discusses the microcirculatory function of specific organ systems The first volume of The Physiology and Pharmacology of the Microcirculation presented some general aspects of microcirculatory function and then concentrated on the microcirculation of a specific organ system namely brain eye heart and kidneys This second and final volume continues the presentation of microcirculatory function of specific organ systems The book begins with a chapter on the microcirculation of the lungs with a description of its microcirculatory features and current methods of study This is followed by separate chapters on the microcirculation of the splanchnic organs These include the stomach emphasizing hemodynamics tissue oxygenation and control of blood flow the small and large intestine Subsequent chapters deal with the microcirculatory responses of both the liver and spleen to different physiological and pharmacological challenges the microcirculation of the skin with emphasis on human microcirculation normal and abnormal microcirculatory dynamics in skeletal muscle microcirculation of bone and microcirculation of the salivary glands and exocrine pancreas The final chapter presents a selective review of pathological events involving the microcirculation with the emphasis directed toward human diseases

Microcirculatory Approach to Asian Traditional Medicine Hideyuki Niimi, 1996 Hardbound This book comprises selected papers presented at the meeting on Asian Traditional Medicine and Microcirculation held in Beijing August 1995 Ideas on the present status of Asian Traditional Medicine and on strategy for scientific evaluation were exchanged with guests from Europe America and Asia The symposium critically examined modern concepts and methods for a comprehensive evaluation of Asian traditional therapies such as herbal medicine and acupuncture This book considers the significance of Asian Traditional Medicine from the viewpoint of the microcirculatory science including the European view of Asian Traditional Medicine Modern concepts and methods in microcirculation are proposed for evaluating therapies comprehensively Microcirculatory aspects of Asian Traditional Medicine are reported with clinical applications of biophysical magnetism or acupuncture or herbal medicines in Asia and Europe and opinions for developing

Progress in Microcirculation Research Hideyuki Niimi, 1994

Microcirculation, an Update Masaharu Tsuchiya, 1987

Dan Shen (Salvia miltiorrhiza) in Medicine Xijun Yan, 2014-10-27 This book reviews research on Dan Shen compiles data from clinical trials and biological experiments and summarizes the latest research advances It covers the medicinal herb herbal pieces and new proprietary drugs that contain it it also covers simple and compound traditional and contemporary formulas and addresses a broad range of subjects including standardized cultivation biodiversity effective substances and their biological activities quality control and clinical trials The book goes on to present the clinical trials on Dantonic especially focusing on its therapeutic effects for coronary heart disease It discusses compound prescriptions and compatibilities from the herbal

piece level to composition level and describes approaches to research on modern Chinese medicine Volume 1 describes the biology and chemistry of Dan Shen while Volume 2 focuses on pharmacology and quality control Volume 3 describes the clinical research on Dan Shen Editor Xijun Yan is the President of Tianjin Tasly Group and a Member of the TCM Standardization Technical Committee Gathering contributions from more than 100 authors working in the field of pharmaceutical and clinical research the book presents and analyzes the available information from multiple aspects reflects the current status of Dan Shen research and offers an essential reference work for further research and development

Microcirculation, Endothelium, and Lymphatics, 1985 **Recent Advances in Clinical Microcirculatory**

Research David H. Lewis, 1977 *Blood Vessels and Lymphatics in Organ Systems* David Irvin Abramson, Philip B. Dobrin, 1984 *Blood Vessels and Lymphatics on Organ Systems* provides an introduction to the general and the specific characteristics of blood vessels and lymphatics in organ systems It offers a structured multidisciplinary approach to the broad field of vascular science emphasizing both established and recent concepts These include vascular networks such as those in the pineal parathyroids pancreas adrenals adipose tissue and special senses and functions of vascular endothelium The book is organized into two parts Part One on the general properties of blood vessels and lymphatics deals with th

European Conference on Microcirculation European Conference on Microcirculation, 1972 The Physiology and Pharmacology of the Microcirculation Nicholas A. Mortillaro, 1983 *The Physiology and Pharmacology of the Microcirculation* Volume 1 discusses the biochemistry metabolism pharmacology and physiology of the general microcirculation This volume is organized into nine chapters that explore the microcirculation in several organ systems such as brain eye heart and kidney The introductory chapters treat the biochemistry of isolated elements of the microvasculature with special emphasis on the central nervous system These chapters also explore the microvascular element and the vascular smooth muscle focusing on their ultrastructural characteristics inne **Basic Aspects of Microcirculation** Masaharu Tsuchiya, Makishige Asano, Masaya Oda, 1982 **Advances in Microcirculation**, 1972
