Robbins, Tim Judge, 2009 Robbins Judge provide the research you want in the language your students understand accompanied with the best selling self assessment software SAL Some topics include management functions the social sciences helping employees balance work and other responsibilities improving people skills improving customer service motivational concepts communication power and politics conflict and negotiation culture and stress management Globally accepted and written by one of the most foremost authors in the field this is a necessary read for all managers human resource workers and anyone needing to understand and improve their people skills **Organizational Behavior in Sport Management** MacIntosh, Eric W., Burton, Laura, 2018-05-31 Organizational Behavior in Sport Management provides numerous real life examples from organizations and immerses students in the key behavioral issues that those in sport organizations face today The text comes with an instructor guide that offers many useful tools to help instructors enhance students learning Customer Selection Oliver Lonicer, 2002-01-11 Inhaltsangabe Abstract In the real world all customers are not created equal This allusion to the Declaration of Independence captures a recent realisation of many companies different customers represent different values to a company In fact many companies are discovering that a large percentage of their customers are generating losses XY Insurance is among those companies that recently discovered a considerable portion of unprofitable customers in their current book of business This was identified as a major problem especially considering the fact that the company is converting to a publicly traded stock company Given the necessity to produce shareholder value senior management realised that it would be indispensable to

ensure the profitability of its accounts One of the factors underlying this problem at XY is the lack of a screening process to ensure the selection of customers with whom a profitable relationship can be built To address this need XY s senior management decided that it would be necessary to develop a tool that enables the sales staff to evaluate customers and ultimately to select customers based on this assessment The objective of this study is the development of a screening tool which can be used as a basis for the selection of XY s customers in the company s large case segment The development of the tool is limited to one of the company s segments because the customers as well as the products differ greatly by segment The tool should enable the company to assess their clients individually and classify each of them as attractive or unattractive so that proper strategies can be applied The strategy development lies outside of the confines of this study and is therefore not discussed in this paper I will however indicate starting points and some important issues when designing these strategies In addition considerations in conjunction with the implementation and introduction process as well as avenues for further research are addressed where appropriate White the initial idea behind the development of the screening tool was to design a mechanism that would allow for the assessment of all of XY s customers existing and prospective it became apparent that this would not be feasible Separate tools for both stages are needed As a result it was decided that a model outlining the needed criteria would be developed and based on this a screening tool for prospective clients would be built The
