Organizing Rural China Rural China Organizing Challenges Facing Chinese Political Development:

Organizing Rural China — Rural China Organizing Ane Bislev, Stig Thøgersen, 2012-04-05 During the early 1980s China embarked on what can be seen as one of the world's largest social experiments ever. Decollectivization meant much more than the reorganization of agricultural production into family-based farming. It signaled significant changes to rural social relations when privatization, marketization, and increased geographical mobility started tearing apart the economic and social institutions that had structured collective village life under Mao. The focus of this book is on how rural society has been reorganized in the 21st century. The first chapters outline the basic organizational structure of rural China and can be used as an introduction to the topic in a classroom setting. They show how the state and its social scientists draw up plans to overcome the perceived lack of rural social organization and discuss the often problem-ridden implementation of their ideas. The second section presents case studies of institutions that organize key aspects of rural life. Boarding schools where rural children learn to accept organizational hierarchies, lineage organizations carving out new roles for themselves, dragonhead enterprises expected to organize agricultural production and support rural development, and several others. The book is of theoretical interest because of its focus on the re-embedding or reintegration of individuals into new types of collectivities which are less predetermined by tradition and habit and more a matter of at least perceived individual choice. Most chapters are based on extensive fieldwork and contain vivid examples from daily life which will make the book attractive to anyone who wants to understand how Chinese villagers experience the extraordinary social changes they are going through.

Taiwan and the Rise of China Baogang Guo, Chung-Chian Teng, 2012-01-01 Taiwan and the Rise of China examines one of the fast evolving yet very volatile fragile and asymmetric bilateral relations in East Asia. The insightful analyses provided by the experts of China studies should be of great interest to scholars, students and policy makers

Confucianism in Contemporary Chinese Politics Shanruo Ning Zhang, 2016-03-29 This book examines the ways in which Confucian political culture operates in contemporary Chinese politics and influences its development. The author argues that the authoritarian political culture performs functions similar to the democratic political culture, drawing on a wide range of data, surveys, interviews, archives, Public Hearing Meeting records and the Party Congress Reports of the Chinese Communist Party to substantiate and illustrate these arguments. In an authoritarian political system, the legitimating values of the authoritarian political culture persuade the public of their government's legitimacy and the engaging values equip individuals with a set of cultural dispositions, resources and skills to acquire political resources and services from the state. In the context of Chinese politics, personal connections infused with affection and trust, the Social Capital in the Confucian culture facilitate political engagement. Despite the country's continuous advocacy for the rule of law, state and public perceptions of legal professionals and legal practices such as mediation and lawyer-judge relations are fundamentally moralized. A new people ideology which originated in the Confucian political culture has been reappropriated to legitimate the Party's hegemonic governing position and policies

Governance Innovation and Policy Change Nele Noesselt, 2018-10-15 This edited volume assesses governance innovation and institutional change under the fifth generation of China's political leaders headed by Xi Jinping. The configuration of long term policy innovation without regime change requires skilled political actors who secure strategic majorities and set up coalitions to design and launch new policies. Recalibrations or reconfigurations of the governance model respond to domestic reform pressures or external shocks in order to secure regime survival. Given that most structural constraints and reform pressures do not arise out of a sudden, the thrilling question is why the political elites sometimes decide not to engage in institutional reforms despite of widespread societal support for major restructuring and why they suddenly launch institutional changes in times of relative stability. The authors address these issues by focusing on basic patterns and paradigms of governance and institutional change in China, the actors and drivers of governance innovation as well as the impact of norms, values and socio cognitive orientations. This is added by some reflections on the interplay between abstract ideas, reform debates and the making of concrete decisions as outlined by the Third Plenum on socio-economic reforms in 2013 and the Fourth Plenum on rule based governance fazhi in 2014

Challenges Facing Chinese Political Development Sujian Guo, Baogang Guo, 2007 Examining the challenges of Chinese political development from a holistic perspective, each of the authors emphasizes a particular dimension of political culture, political economy, foreign policy and environmental and social challenges
