## Out Of Eden Out Of Eden:

*Out of Eden: The Peopling of the World* Stephen Oppenheimer, 2012-03-01 In a brilliant synthesis of genetic archaeological linguistic and climatic data Oppenheimer challenges current thinking with his claim that there was only one successful migration out of Africa In 1988 Newsweek headlined the startling discovery that everyone alive on the earth today can trace their maternal DNA back to one woman who lived in Africa 150 000 years ago It was thought that modern humans populated the world through a series of migratory waves from their African homeland Now an even more radical view has emerged that the members of just one group are the ancestors of all non Africans now alive and that this group crossed the mouth of the Red Sea a mere 85 000 years ago It means that not only is every person on the planet descended from one African Eve but every non African is related to a more recent Eve from that original migratory group This is a revolutionary new theory about our origins that is both scholarly and entertaining a remarkable account of the kinship of all humans

evil rather than on the occasions for its appearance Kahn argues that evil originates in man's flight from death He urges us to see that the opposite of evil is not good but love while evil would master death love would transcend it Offering a unique perspective that combines political and cultural theory law and philosophy Kahn here continues his project of advancing a political theology of modernity This is no ordinary account of what is usually meant by the problem of evil Instead Paul W Kahn's aim is to explore the nature of evil itself A rich and fascinating book full of unusual conjunctions and insights John Habgood Times Literary Supplement      **Life After Magnet Memories - The Return of the Secret Series: 1988-1994**
