Adventure and Society Simon Beames, Chris Mackie, Matthew Atencio, 2018-12-28 This undergraduate textbook provides a broad overview of the ways in which adventurous practices influence and are influenced by the world around them. The concept of adventure is one that is too often tackled within subject silos of philosophy, education, tourism or leisure. While much of the analysis is strong, there is little cross pollination between disciplines. Adventure Society pulls together the threads of these discourses into one coherent treatment of the term adventure and the role that it plays in human social life of the 21st century. It explores how these practices can be considered more deeply through theoretical discourses of capitalism, identity construction, technology and social media, risk taking, personal development, equalities and sustainability. As such, the book speaks to a broad audience of undergraduate and postgraduate students across diverse subject areas and aims to be an accessible starting point for deeper inquiry.

Technology, Social Media and the Outdoors Simon Kennedy Beames,Patrick T. Maher,2024-08-29 This is the first book to explore the numerous ways in which mobile technologies and social media are influencing our outdoor experiences Across the fields of outdoor education outdoor recreation and leisure and nature based tourism the book considers how practices within each of those domains are being influenced by dramatically shifting interactions between technology humans the natural world and wider society Drawing on cutting edge research by leading scholars from around the world and exploring key concepts and theory as well as developments in professional practice the book explains how digital technology and media are no longer separate from typical human and social activity Instead the broader field of outdoor studies can be viewed as a world of intertwined socio technical assemblages that need to be understood in more diverse ways The book offers a full spectrum view of this profound shift in our engagement with the world around us by presenting new work on subjects including networked spaces in residential outdoor education digital competencies for outdoor educators the use of social media in climbing communities and the impact of digital technologies on experiences of adventure tourism This is essential reading for anybody with an interest in outdoor studies outdoor education adventure education leisure studies tourism environmental studies environmental education or science technology and society studies

The Changing World of Outdoor Learning in Europe Peter Becker, Barbara Humberstone, Chris Loynes, Jochem Schirp, 2018-06-12. The Changing World of Outdoor Learning in Europe sets out to provide a comprehensive analysis of the economical and political changes that have occurred in European outdoor culture in the preceding two decades from a diverse range of perspectives including institutional, theoretical, national and educational views. The book looks at how outdoor education has been transformed into an increasingly global field where established and influenced practices have been introduced into modernising and democratising nations. With contributions from the members of the board of the European Institute of Outdoor Adventure Education and Experiential Learning and representatives of the networks that stand behind it this unique book provides thorough factual analyses and examinations of outdoor learning that have never been presented before. The book contains contributions from across Europe with authors from the UK, Germany, Finland, Sweden, Slovenia, Poland, Norway and the Czech Republic. Chapters within the volume by non-European authors provide another perspective on the European story in a wider context. As a whole the book will stimulate the ongoing debate about the nature, function and organisation of outdoor education around the globe. The Changing World of Outdoor Learning in Europe will be of great interest to academics, researchers and postgraduate students in the fields of outdoor education, leadership and recreation and outdoor sport, environmental and leisure studies. It should also be essential reading for those involved in outdoor organisations in Europe and worldwide.

Journal of Park and Recreation Administration, 2001 **Introduction to Emotional and Behavioral Disorders** Mary M. Jensen, 2005. Focusing on today's realities in the schools and in society this practical book will assist general and special education teachers of preschool through Grade 12 to recognize conduct that may lead to academic underachievement and emotional behavioral problems. A knowledge of the symptoms of such disorders can lead to appropriate interventions that reduce problem behavior, increase socially acceptable behavior and improve academic performance without recourse to ineffective punishment. Coverage examines common disorders such as autism and ADD/ADHD along with such conditions as Tourette syndrome, gangs, eating disorders, depression and others that may lead to learning and behavioral problems. The author presents the characteristics of each disorder, offers observable behaviors and assessment methods and suggests positive proactive classroom management strategies designed to teach appropriate replacement skills for undesirable behaviors. For general and special education teachers in the pre and elementary school
