The Philosophy and Practice of Outstanding Early Years Provision Pat Beckley, 2018-06-14 This book examines the philosophical and theoretical foundations of early years practice and supports practitioners as they reflect on the collective and personal rationales which motivate and inform their work with young children. Theoretical underpinnings are explored from a variety of perspectives and are translated into effective strategies for application in a range of early years settings. Featuring contributions from leading early years professionals, *The Philosophy and Practice of Outstanding Early Years Provision* draws on sound expertise to deepen the reader's understanding of the concepts and ideas behind everyday practice. The book is divided into four easily navigated sections which explore key issues including the creation of enabling environments, leadership in the early years, the opportunities and challenges presented by diversity and the value of creative approaches. Recommended strategies are discussed in relation to emerging global pressures and the needs of the contemporary child, inviting practitioners to modify and enhance future behaviour and practice. This will be essential reading for students and practitioners who wish to improve current and future practice by gaining insight into the philosophical foundations which underpin outstanding provision.

Strong Foundations in Early Mathematics Lorna Earle, Sam Parkes, 2023-01-11 Developing the building blocks for mathematics. This book supports early years teachers and practitioners to enable children to build Strong Foundations in Mathematics. It focuses on children's learning and development in mathematics in the critical reception year. It supports trainee teachers and early years students to reflect on their own mathematics learning and how this influences their teaching and subject confidence. It acknowledges the uniqueness of the early years and explores the mathematical pedagogies of the EYFS. Importantly the book challenges the assumption that early years mathematics is not proper maths.
