## **Oversharing Ben Agger:**

*Oversharing: Presentations of Self in the Internet Age* Ben Agger, 2015-02-11 People overshare when they interact with others through the screens of computers and smartphones. Oversharing means to divulge more of their inner feelings, opinions and sexuality than they would in person or even over the phone. Text messaging, Facebooking, tweeting, camming, blogging, online dating and internet porn are vehicles of this oversharing, which blurs the boundary between public and private life. This book examines these presentations of self, acknowledging that we are now much more public about what used to be private. With this second edition, Agger adds a new chapter on whether privacy is possible that addresses selfies, job loss due to oversharing, the surveillance state and examples of when the private should go public.

North American Critical Theory After Postmodernism

P. Nickel, 2012-08-21 In a series of interviews, this book explores the formative experiences of a generation of critical theorists whose work originated in the midst of what has been called the postmodern turn, including discussions of their views on the evolution of critical theory over the past 30 years and their assessment of contemporary politics.

Connecting Families? Barbosa Neves, Barbara, Casimiro, Cláudia, 2018-06-26 Are Information and Communication Technologies (ICTs) connecting families? And what does this mean in terms of family routines, relationships, norms, work, intimacy and privacy? This edited collection takes a life course and generational perspective, covering theory including posthumanism and strong structuration theory and methodology, including digital and cross-disciplinary methods. It presents a series of case studies on topics such as intergenerational connections, work-life balance, transnational families, digital storytelling and mobile parenting. It will give students, researchers and practitioners a variety of tools to make sense of how ICTs are used, appropriated and domesticated in family life. These tools allow for an informed and critical understanding of ICTs and family dynamics.

*The Decline of Public Access and Neo-Liberal Media Regimes* Brian Caterino, 2020-04-28 This book examines the reasons behind the declining fortunes of public access channels. Public access, which provided perhaps the boldest experiment in popular media democracy, is in steep decline. While some have argued it is technologically outmoded, Caterino argues that the real reason lies with the rise of a neo-liberal media regime. This regime creates a climate in which we can understand these changes. This book considers the role of neo-liberalism in transforming notions of public obligations and regulation of media that have impacted non-profit media, specifically public access. Neo-liberalism has tried to eliminate public forums and public discourse and weakens institutions of civil society. Though social media is often championed as an arena of communicative freedom, Caterino argues that neo-liberalism has created a colonized social media environment that severely limits popular democracy.
