[The Collapse of Darwinism, Or, The Rise of a Realist Theory of Life](#) Graeme Donald Snooks,2003-01-01 In this provocative work noted social and economic theorist Graeme D Snooks exposes fatal flaws in the foundations of the Darwinian theory of evolution Further he develops a remarkable replacement theory of evolution The new dynamic strategy theory views life as a strategic pursuit rather than a game of chance in which organisms adopt dynamic strategies only one of which is genetic change to survive and prosper This theory reveals the organism as empowered rather than as the plaything of gods genes or blind chance And it provides a powerful new basis for humanism **The Rise of Neo-liberalism and the Decline of Freedom** Birsen Filip,2020-12-01 This book examines the relationship that prevails between the state and freedom in the works of Milton Friedman and Friedrich Hayek

as well as those of some of their peers including Gary Becker James Buchanan and George Stigler The author explains that their concept of freedom was largely derived from the principles and values of neo liberalism However she maintains that neo liberals never cared about providing the masses with genuine freedom rather they value freedom for its instrumental value in terms of facilitating the global spread of free market capitalism The author explains that the neo liberal concept of freedom has been a very useful tool in promoting the superiority of free market capitalism over centrally planned economies aimed at achieving the common good She argues that even though neo liberals are strongly opposed to central planning they are tolerant of state planning intended to help establish and sustain the conditions of a free market system She also contends that the extensive implementation of neo liberal reforms and policies has led to states losing their sovereignty and moving away from their traditional role of achieving the common good The author claims that the world has essentially become the sum of many neo liberal societies particularly during the last four decades She also maintains that throughout human history no other ideology school of thought political religious or military institution kingdom or empire has been as successful as neo liberalism when it comes to shaping people s beliefs ideals goals and lifestyle on a global scale Unfortunately neo liberalism has proven to be very detrimental for civilization and the future of the planet The author concludes that the widespread adoption of the neo liberal concept of freedom in combination with the pretense that economics is a natural ahistorical and value free science has triggered the emergence of methodological monism which has resulted in unfreedom and the poverty of economics while also delaying the progress of the entire discipline

The basic desideratum of the present volume is to threadbare the fundamental theories of economics and their evolutionary trajectory in a simplified way devoid of verbosity and rigmarole. The traces of economic theories have been analysed with reference to *inter alia* their methodological foundations and historical genesis. Past and present theories have been categorised under taxonomical schema into major schools to properly appreciate and differentiate their respective contributions. The historicity of some of the important micro and macro theories have been depicted in a very precise way so as to keep the subject well within the area of bounded rationality of the average reader. The final part of the study briefly recapitulates the contemporary issues and changes in macro and monetary economics and also the substantive development in development economics. It is believed that this little volume will enable the readers to have a bird's eye view of the broad panorama of economic theories both past and present. B. N. Ghosh, PhD India, M. **The Scientific Revolution Revisited** Mikuláš Teich, 2015-04-20. The Scientific Revolution Revisited brings Mikul Teich back to the great movement of thought and action that transformed European science and society in the seventeenth century. Drawing on a lifetime of scholarly experience in six penetrating chapters Teich examines the ways of investigating and understanding nature that matured during the late Middle Ages and the Renaissance charting their progress towards science as we now know it and insisting on the essential interpenetration of such inquiry with its changing social environment. The Scientific Revolution was marked by the global expansion of trade by European powers and by interstate rivalries for a stake.

in the developing world market in which advanced medieval China remarkably did not participate It is in the wake of these happenings in Teich's original retelling that the Thirty Years War and the Scientific Revolution emerge as products of and factors in an uneven transition in European and world history from natural philosophy to modern science feudalism to capitalism the late medieval to the early modern period With a narrative that moves from pre classical thought to the European institutionalisation of science and a scope that embraces figures both lionised and neglected such as Nicole Oresme Francis Bacon Thomas Hobbes Isaac Newton Ren Descartes Thaddeus Hagecius Johann Joachim Becher The Scientific Revolution Revisited illuminates the social and intellectual sea changes that shaped the modern world **After 9/11** Dalhousie University.
