indeed get lost in translation ***Issues in Arabic Legal Translation*** Sonia A. Halimi,Djamel Goui,2025-03-10 This edited collection provides an insightful study of the state of the art in legal translation. It not only presents the latest research on legal translation pragmatics terminology and intercultural communication but also delivers an account of the situation of legal translation in a selection of Arabic speaking countries representing the four regions of the Arab world in an attempt to show when and how legal translation is done. Shiyab,2017 This book introduces students to the theory and practice of translation. It also examines issues that are often debated such as the concept of meaning translation as an art or science fallacies of translation and translation rules and ethics. One of the distinguishing features is that there is a set of questions found at the end of each chapter that tests the student's knowledge of the information covered. use to generate bilingual lexicons. This can be problematic when the translator does not have such a corpus for instance when the text belongs to an emerging field. To solve this issue CAT research has looked into the leveraging of comparable corpora i.e. a set of texts in two or more languages which deal with the same topic but are not translations of one another. This work had two primary objectives. The first is to assess the input of lexicons extracted from comparable corpora in the context of a specialized human translation task. The second objective is to identify bilingual lexicon extraction methods which best match the translators needs determining the current limits of these techniques and suggesting improvements. The author focuses in particular on the identification of fertile translations the management of multiple morphological structures and the ranking of candidate translations. The experiments are carried out on two language pairs English-French and English-German and on specialized texts dealing with breast cancer. This research puts significant emphasis on applicability methodological choices are guided by the needs of the final users. This book is organized in two parts the first part presents the applicative and scientific context of the research and the second part is given over to efforts to improve compositional translation. The research work presented in this book received the PhD Thesis award 2014 from the French association for natural language processing ATALA.

Translation Issues in Language and Law F. Olsen, R. Lorz, D. Stein, 2009-03-19. With contributions from world class specialists this first book length work looks at translation issues in forensic linguistics where accuracy and cultural understandings play a prominent part in the legal process.
