**Modules** Cheryl Cisero Durwin, Marla Reese-Weber, 2020-01-07 EdPsych Modules uses an innovative modular approach and case studies based on real life classroom situations to address the challenge of effectively connecting theory and research to practice Succinct stand alone modules are organized into themed units and offer instructors the flexibility to tailor the book s contents to the needs of their course The units begin with a set of case studies written for early childhood elementary middle and secondary classrooms providing students with direct insight into the dynamics influencing the future students they plan to teach All 25 modules highlight diversity emphasizing how psychological factors adapt and change based on external influences such as sex gender race language disability status and socioeconomic background The Fourth Edition includes over three hundred new references across all 25 modules and expanded coverage of diversity in new diversity related research This title is accompanied by a complete teaching and learning package *Interrogating Whiteness and Relinquishing Power* Nicole M. Joseph, Chayla Haynes, Floyd Cobb, 2016 *Interrogating Whiteness and Relinquishing Power* White Faculty s Commitment to Racial Consciousness in STEM Classrooms is a collection of narratives that will transform the teaching of any faculty member who teaches in the STEM system The book links issues of inclusion to teacher excellence at all grade levels by illuminating the critical influence that racial consciousness has on the behaviors of White faculty in the classroom It functions as an analytical tool scaffolding exemplary examples to inspire readers to engage in the complex and difficult work of assessing their own racial consciousness and teacher effectiveness White pre service teachers in STEM education rarely see the importance of the link between race and the teaching and learning of mathematics in part because the White faculty who are teaching these subjects rarely engage in the study of racial projects in STEM From this perspective the authors of this book contend that the classroom is a racialized environment that if not addressed can reproduce racial structures and hierarchies in cyclical ways Integrating vocabulary instruction in mathematics through the learning cycle

Kimberly J. Omanchi, 2014 Research has revealed that understanding language is the foundation of all learning. Unfortunately, direct instruction focuses on the comprehension of vocabulary in fictional text and writing but not in the content areas such as mathematics. Students who read at grade level can easily become students who struggle to understand concepts in math. Mathematics vocabulary are words that are not commonly used at home so many students do not have exposure to these words prior to coming to school. This lag in learning vocabulary has a significant impact on students' success in mathematics. This project explores the recent history of using graphic organizers as well as classroom discussion to improve comprehension of mathematics vocabulary. This project uses robust vocabulary instruction to guide students to create student-friendly definitions to study the worlds in a variety of contexts and to organize the complex information visually using graphic organizers. Then the classroom teacher can guide students in a critical discussion of the mathematical vocabulary so they can create a deeper understanding of the mathematical concepts tied to the vocabulary. Additionally, the project provides students a Number Talk notebook to record and share their thinking about mathematical concepts before, during, and after learning. The Notebook also becomes a reference tool for the mathematical vocabulary as students use it to record and illustrate the vocabulary as it is learned.

*Strategies for Building Academic Vocabulary in Mathematics* Christine Dugan, 2010-02-01 Boost students' mathematics vocabulary with easy-to-implement effective strategies. Sample lessons using each strategy are included for grade spans 1-2, 3-5, and 6-8 using vocabulary words from standards-based content-specific units of study. Each strategy also includes suggestions for differentiating instruction. Each notebook includes 25 research-based strategies, differentiation suggestions for each strategy, assessment strategies, sample word lists including both specialized content and general academic words, and parent letters in both English and Spanish. Also included is a Teacher Resource CD with PDFs of resource pages, word lists, assessment pages, and parent letters.
