Participatory Budgeting Europe Democracy Governance:

Participatory Budgeting in Europe Yves Sintomer, Anja Röcke, Carsten Herzberg, 2016-03-10 Can participatory budgeting help make public services really work for the public Incorporating a range of experiments in ten different countries this book provides the first comprehensive analysis of participatory budgeting in Europe and the effect it has had on democracy the modernization of local government social justice gender mainstreaming and sustainable development By focussing on the first decade of European participatory budgeting and analysing the results and the challenges affecting the agenda today it provides a critical appraisal of the participatory model Detailed comparisons of European cases expose similarities and differences between political cultures and offer a strong empirical basis to discuss the theories of deliberative and participatory democracy and reveal contradictory tendencies between political systems public administrations and democratic practices

International Trends in Participatory Budgeting Michiel S. De Vries, Juraj Nemec, David Špaček, 2021-11-26 This book analyses the participatory budgeting practice as it has evolved in evaluated countries focusing on what is substantially at stake concerning the budget and issues involved the actual participation the way such processes are organised and administered and the outcomes of such processes It concludes that participatory budgeting in selected European countries is far away from the level of best practice but that all experiences are not just trivial pursuits The information collected serves to check to what extent participatory budgeting as practiced in the countries involved presents a real attempt to change municipal budgets towards addressing the needs of marginalized groups and to improve decision making based on local democracy and participation or whether these processes as such are to be judged to be more important than any output and outcomes The practices can neither be seen as a process of policy diffusion nor as a process of policy mimesis The terminology of participatory budgeting remains but the tools to achieve the goals resulted only in marginal changes in the status quo in municipalities in European countries practicing participatory budgeting instead of resulting in radical changes to increase spending in favor of marginalized groups Chapter 15 Unraveled Practices of Participatory Budgeting in European Democracies is available open access under a CC BY 4.0 license

Experimentalist Governance Bernardo Rango, 2023 This book demonstrates the conditions trajectories and mechanisms of non hierarchical experimentalist governance Analysing five crucial domains electricity gas communications finance and pharmaceuticals in the European Union it examines when how and why non hierarchical institutions affect policy processes and outcomes

Rethinking Democratic Innovation Frank Hendriks, 2023 Rethinking Democratic Innovation takes a fresh look at diverging visions of improving democratic governance and asks whether these existing tensions could be made productive Could different visions of democratic revitalisation complement and correct each other in ways that are good for democracy Is it conceivable that combined approaches address a larger part of the democratic challenge while isolated approaches centralizing deliberative or plebiscitary democracy are confined to more limited areas of concern This book ultimately

provides an affirmative answer outlining the scope for hybrid democratic innovations that thrive on exploiting not eliminating tensions between diverging visions of improved democracy Supplementing democratic theory with a cultural perspective this book contributes to a deeper understanding of plans and methods geared toward improving democratic governance Revisiting Mary Douglas's seminal take on culture as pollution reduction processes of democratic innovation are understood as instances of cultural cleaning in public governance The book recognizes that democratic cleaning will never be finished but can be done in ways that are more productive Reflecting on varieties of hybrid democratic innovation deliberative referendums participatory budgeting new style and more the author posits that more versatile connective and embedded innovations stand a better chance of high performance on a broader spectrum than democratic innovations falling short of these qualities

The Future of Self-Governing, Thriving Democracies Brigitte Geissel, 2022-11-15 This book offers a new approach for the future of democracy by advocating to give citizens the power to deliberate and to decide how to govern themselves Innovatively building on and integrating components of representative deliberative and participatory theories of democracy with empirical findings the book provides practices and procedures that support communities of all sizes to develop their own visions of democracy It revitalizes and reinfuses the democratic spirit going back to the roots of democracy as an endeavor by with and for the people and should inspire us in our search for the democracy we want to live in This book is of key interest to scholars and students in democracy democratic innovations deliberation civic education and governance and further for policy makers civil society groups and activists It encourages us to reshape democracy based on citizens perspectives aspirations and preferences

Perspective Brian Wampler, Stephanie McNulty, Michael Touchton, 2021-07-15 Participatory Budgeting continues to spread across the globe as government officials and citizens adopt this innovative democratic program in the hopes of strengthening accountability civil society and well being Governments often adapt PB's basic program design to meet local needs thus creating wide variation in how PB programs function Some programs retain features of radical democracy others focus on community mobilization and yet other programs seek to promote participatory development Participatory Budgeting in Global Perspective provides a theoretical and empirical explanation to account for widespread variation in PB's adoption adaptation and impacts This book develops six PB types to account for the wide variation in how PB programs function as well as the outcomes they produce To illustrate the similar patterns across the globe four empirical chapters present a rich set of case studies that illuminate the wide differences among these programs chapters are organized regionally with chapters on Latin America Asia Sub Saharan Africa Europe and North America By organizing the chapters regionally it becomes clear that there are temporal spatial economic and organizational factors that produce different programs across regions but similar programs within each region A key empirical finding is that the change in PB rules and design is now leading to significant differences in the outcomes these programs produce We find that some programs successfully promote accountability expand civil society and improve well being but too often researchers do not have any evidence tying PB to significant social or political change *Participatory Democratic Innovations in Europe* Brigitte Geißel, Marko

Joas, 2013-11-20 Representative democracy is often seen as a stable institutional system insusceptible to change However the preferences of the broad public are changing and representative group based democracy has lost importance This development made it necessary to change established ways of decision making and to introduce participatory democratic innovations Many national and sub national governments followed this route and implemented various kinds of participatory innovations i.e. the inclusion of citizens into processes of political will formation and decisionmaking The authors analyse and evaluate the various effects of these innovations in Europe providing a bigger picture of the benefits and disadvantages different democratic innovations can result in **Democratic Governance** Séverine Bellina, Hervé Magro, Violaine de Villemeur, France. Ministère des affaires étrangères et européennes, 2009 Governance has become a key word in the lexicon of international relations over the last twenty years It is used loosely and invariably in a liberal idiom by scholars activists civil society organizations politicians and the voluntary sector In many respects it has attained the status of a fetish yet

governance remains a notion that has multiple definitions a concept in the making Notwithstanding the imprecision with which the term is employed it has become an inescapable paradigm for the politics of development The contributors to this book drawn from among some of the world s best area studies specialists from North and South offer a diverse global critique of governance as deployed in several key areas institutions and state actors the rule of law democracy and human rights decentralization and state power development and last but not least international cooperation and the role of the World Bank the IMF and NGOs The geographical spread of the volume ranges from Africa to Latin America from Asia to the Middle East Their objectives include a reassessment of governance in its many manifestations an attempt to free the term from its often unhelpful linkage to the state and thereby apply it to other organizations and actors a re evaluation of the Western dominated use of the term politically and an attempt to broaden its application beyond issues such as transparency and the fight against corruption and a search for innovative applications of the term driven by a consensus that transcends current economic and political inequalities

European E-Democracy in Practice Leonhard Hennen,Ira van Keulen,Iris Korthagen,Georg Aichholzer,Ralf Lindner,Rasmus Øjvind Nielsen,2019-11-06 This open access book explores how digital tools and social media technologies can contribute to better participation and involvement of EU citizens in European politics By analyzing selected representative e participation projects at the local national and European governmental levels it identifies the preconditions best practices and shortcomings of e participation practices in connection with EU decision making procedures and institutions The book features case studies on parliamentary monitoring e voting practices and e publics and offers recommendations for improving the integration of e democracy in European politics and governance Accordingly it will appeal to scholars as well as practitioners interested in identifying suitable e participation tools for European institutions and thus helps to reduce the EU s current democratic deficit This book is a continuation of the book *Electronic Democracy in Europe* published by Springer

Public Administration and Democratic Governance United Nations. Division for Public Administration and Development Management,2007 Strengthening trust accountability and participation in government are essential to serving the needs of citizens This volume brings together concepts and ideas from around the world on how to achieve more responsive and accountable public administration within the framework of democratic governance Public officials and administrators are provided with conceptual and policy tools to help them understand today s complex challenges and to pursue ideas that are most likely to enhance service delivery from the citizen s perspective The publication is one of the analytical products emerging from the Global Forum on Reinventing Government

Schools of Democracy Julien Talpin,2024-10-31 *Schools of Democracy* offers a vivid analysis of the long term impact of engagement in participatory budgeting institutions in Europe While democratic innovations flourish around the world there have been great hopes for their potential to revitalize representative government and solve the increasing apathy of the public Based on a rich ethnographic study in France Italy and Spain this book shows how participatory institutions can

encourage personal involvement by creating the procedural and social conditions conducive to the formation of a competent and involved citizenry Rather than deliberation itself it seems that informal discussions and interactions between a diverse public allow mutual learning and the beginning of a political trajectory for people at the margins of the public sphere However this book also shows that citizens can become disappointed by the little decision making power they are granted as they leave the process often more cynical than before Contains A unique study on the long term individual impact of engagement in participatory institutions While most research deal with short term impact Schools of democracy addresses impact of participation after two years of engagement Unique access to the black box of participatory institutions While research on democratic innovations generally opt for an externalist perspective Schools of democracy details the routine of deliberative interactions showing how ordinary citizens speak up in public assemblies From this perspective the book offers incredibly rich empirical material coming from ethnographic research on how participatory democracy works An original theoretical framework to the study of the individual impacts of participatory engagement While most research are based on an implicit rational choice perspective the pragmatist perspective adopted here sheds a different light on the studied phenomenon stressing the co construction of actors and their environment *CSA Political Science & Government* ,2005
