**Fundamentals of Internet of Things for Non-Engineers** Rebecca Lee

Hammons,Ronald J. Kovac,2019-06-07 The IoT is the next manifestation of the Internet The trend started by connecting computers to computers progressed to connecting people to people and is now moving to connect everything to everything The movement started like a race with a lot of fanfare excitement and cheering We re now into the work phase and we have to figure out how to make the dream come true The IoT will have many faces and involve many fields as it progresses It will involve technology design security legal policy business artificial intelligence design Big Data and forensics about any field that exists now This is the reason for this book There are books in each one of these fields but the focus was always an inch wide and a mile deep There s a need for a book that will introduce the IoT to non engineers and allow them to dream of the possibilities and explore the work venues in this area The book had to be a mile wide and a few inches deep The editors met this goal by engaging experts from a number of fields and asking them to come together to create an introductory IoT book

Fundamentals of Internet of Things for Non Engineers Provides a comprehensive view of the current fundamentals and the anticipated future trends in the realm of Internet of Things from a practitioner s point of view Brings together a variety of voices with subject matter expertise in these diverse topical areas to provide leaders students and lay persons with a fresh worldview of the Internet of Things and the background to succeed in related technology decision making Enhances the reader s experience through a review of actual applications of Internet of Things end points and devices to solve business and civic problems along with notes on lessons learned Prepares readers to embrace the Internet of Things era and address complex business social operational educational and personal systems integration questions and opportunities **Dun's**

**Review** ,1938 **Column Review and Editorial Digest** ,1942 House Furnishing Review ,1942 Cyber Privacy April Falcon Doss,2020-10-20 Chilling eye opening and timely Cyber Privacy makes a strong case for the urgent need to reform the laws and policies that protect our personal data If your reaction to that statement is to shrug your shoulders think again As April Falcon Doss expertly explains data tracking is a real problem that affects every single one of us on a daily basis General Michael V Hayden USAF Ret former Director of CIA and NSA and former Principal Deputy Director of National Intelligence You re being tracked Amazon Google Facebook governments No matter who we are or where we go someone is collecting our data to profile us target us assess us to predict our behavior and analyze our attitudes to influence the things we do and buy even to impact our vote If this makes you uneasy it should We live in an era of unprecedented data aggregation and it s never been more difficult to navigate the trade offs between individual privacy personal convenience national security and corporate profits Technology is evolving quickly while laws and policies are changing slowly You shouldn t have to be a privacy expert to understand what happens to your data April Falcon Doss a privacy expert and former NSA and Senate lawyer has seen this imbalance in action She wants to empower individuals and see policy catch up In Cyber Privacy Doss demystifies the digital footprints we leave in our daily lives and reveals how our data is being used sometimes against us by the private sector the government and even our employers and schools She explains the trends in data science technology and the law that impact our everyday privacy She tackles big questions how data aggregation undermines personal autonomy how to measure what privacy is worth and how society can benefit from big data while managing its risks and being clear eyed about its cost It s high time to rethink notions of privacy and what if anything limits the power of those who are constantly watching listening and learning about us This book is for readers who want answers to three questions Who has your data Why should you care And most important what can you do about it **The Virginia Quarterly Review** ,2016

**The St. Croix Review** ,2002 **Florists' review** ,1952
