Chitra A.,Sanjeevikumar Padmanaban,Jens Bo Holm-Nielsen,S. Himavathi,2020-07-21 Electric vehicles are changing transportation dramatically and this unique book merges the many disciplines that contribute research to make EV possible so the reader is informed about all the underlying science and technologies driving the change An emission free mobility system is the only way to save the world from the greenhouse effect and other ecological issues This belief has led to a tremendous growth in the demand for electric vehicles EV and hybrid electric vehicles HEV which are predicted to have a promising future based on the goals fixed by the European Commission s Horizon 2020 program This book brings together the research that has been carried out in the EV HEV sector and the leading role of advanced optimization techniques with artificial intelligence AI This is achieved by compiling the findings of various studies in the electrical electronics computer and mechanical domains for the EV HEV system In addition to acting as a hub for information on these research findings the book also addresses the challenges in the EV HEV sector and provides proven solutions that involve the most promising AI techniques Since the commercialization of EVs HEVs still remains a challenge in industries in terms of performance and cost these are the two tradeoffs which need to be researched in order to arrive at an optimal solution Therefore this book focuses on the convergence of various technologies involved in EVs HEVs Since all countries will gradually shift from conventional internal combustion IC engine based vehicles to EVs HEVs in the near future it also serves as a useful reliable resource for multidisciplinary researchers and industry teams [Automotive Safety 2024](#) Marek Jaśkiewicz,Rafał Jurecki,Emilia Szumska,2025-03-11 Automotive Safety 2024 presents a comprehensive selection of 36 papers from the 14th International Science and Technical Conference Automotive Safety 2024 The intricate nature of safety issues and continuous advancements in automotive technology drive a steady stream of novel and captivating scientific and technical developments at each edition of the Conference The contributions delve into a wide range of automotive safety topics from broad based studies to specific applications encompassing object recognition accident reconstruction autonomous vehicles driver behaviour micromobility and the perception of intelligent technologies This book constitutes significant and insightful additions to the knowledge in automotive safety serving as a potential impetus for further scholarly endeavours [Electric Vehicle Developments](#) ,1987 **Electric Vehicle Engineering (PB)** Per Enge,Nick Enge,Stephen Zoepf,2021-01-24 A complete guide to electric vehicle design operation and adoption This hands on resource thoroughly explains the technologies and techniques involved in the design and operation of today s electric vehicles Originally written for use in a course co taught by the authors at Stanford University Electric Vehicle Engineering discusses the physics of vehicle motion the electrical principles on which motors rely the chemistry operation and charging of lithium ion batteries the design and operation of motor controllers the energy efficiency and environmental impact of electric vehicles and the policy and

are mostly non transparent to consumers as they put too much weight on the high initial investment costs compared to conventional internal combustion engine vehicles ICEVs and underestimate the cost savings through lower operating costs In order to overcome this misjudgment and to help consumers make more profound purchasing decisions the literature suggests the total cost of ownership TCO approach which includes both investment and operating costs over the ownership period This study aims to compare the consumer oriented TCO for different drivetrains of private transport vehicles in Germany Although the transportation sector emits 19% of Germany s greenhouse gases electric vehicles only account for 17% of the newly registered vehicles in the first half of 2020 As a result the German government approved an increase in subsidies for the purchase of electric vehicles in June 2020 to promote the attractiveness of more environmentally friendly vehicles Against that background this study investigates whether conventional drives still exhibit a financial advantage over electric vehicles For that purpose this study compares the TCO of BEVs PHEVs HEVs FCEVs as well as petrol and diesel ICEVs *Resources for Electric Vehicles and Their Infrastructure* ,1980 *Proceedings of the ...
