Unit 2 Globalization

Module 1: Political, Economic, and Legal Systems

1. What is globalization?
 - a. Globalization is when international integration arises from the interchange of worldviews, products, ideas, and other aspects of culture.
2. What opportunities to businesses are brought by globalization?

Globalism is characterized by an increasing number of worldwide connections, rapid and discontinuous change, an increasing number of diverse participants, and growing complexity. Globalism has resulted in a widespread sharing of ideas. Internet/social media/. globalization has allowed corporations to outsource manufacturing and service jobs from high-cost locations to lower cost locations, where corporations can pay workers lower salaries and provide fewer (or no) benefits.

3. What are the economic, political, and cultural effects of globalization? Elaborate on each of the aspect.
 - a. Economic. Economic globalization refers to the widespread, international movement of goods, capital, services, technology, and information. It is the increasing economic integration and interdependence of national, regional, and local economies across the world through an intensification of the cross-border movement of goods, services, technologies, and capital.
Economic globalization primarily comprises the globalization of production, finance, markets, technology, organizational regimes, institutions, corporations, and labor.
 - b. Political - globalization may ultimately reduce the importance of nation-states. Supranational institutions, such as the European Union, the World Trade Organization(WTO), the Group of Eight (G8), and the International Criminal Court, serve to replace or extend national functions to facilitate international agreement. Increasingly, nongovernmental organizations (NGOs) influence public policy across national boundaries, including humanitarian aid and developmental efforts.
