

The background of the text is a painting. It depicts a person in a landscape, possibly a desert or a rocky shore, looking out towards a body of water. The person is standing on a dark, rocky outcrop. In the upper left, a large, dark, elongated object, resembling a beetle or a small insect, is painted on a light-colored, textured surface that looks like a wall or a cave ceiling. The overall style is somewhat surreal or dreamlike.

## **Our Interplanetary Future A Ufo Primer For Skeptics:**

Walking Through Walls and Other Impossibilities Milton E Brener, 2011-06-09 The goal of the aliens among us is not the study of Earth for purely academic purposes It is something more vital to the aliens and more portentous for us The picture that emerges from much research makes sense of several aspects of the alien presence previously quite puzzling They apparently are a dying race inhabiting a dying planet They have undoubtedly mastered physical forces and phenomena of which we have not even dreamed But it has come at a terrible cost Their emotional life has been all but lost existing only as a faint remnant from a long distant past They may pity our hopelessly primitive technology but they envy us our robust emotional life Like all living things everywhere they live for the perpetuation of their genes They do not hate us nor do they seek our destruction They seek to create a race of hybrids combining their scientifically superior minds with our rich emotional makeup The ridicule of the entire subject by the government and other forces fearful of upheaval in our society has aggravated the suffering of those chosen and victimized by the aliens who apparently seek ineptly sometimes to minimize it The author combines this scholarly approach with an almost folksy narrative style to make Walking Through Walls a very readable and approachable treatise on the phenomena as good as any book on the subject and far more skillfully written than most including those Brener has referenced most frequently Bud Hopkins Intruders and Philip Corso s The Day after Roswell Blue Ink Review

**Wagner and Schopenhauer** Milton E. Brener, 2014-04-04 Most who write about Wagner s operas claim that the works of Arthur Schopenhauer had a huge effect on them The influence Brener believes has been vastly overstated The most detailed exposition of that alleged influence is by Bryan Magee In his Tristan Chord Magee details the bases for what are often by others unsupported conclusions Familiar with both the important writings of Schopenhauer and the works of Wagner Brener is among the few capable of a thorough analysis and factual response to Magee s claims His conclusions backed with primary sources stands almost alone in opposition to accepted dogma

Our Interplanetary Future Milton E. Brener, 2009-11-23 This book asks whether thousands of detailed reports similar to each other coming for decades from reputable persons from 60 nations should be dismissed with ridicule or seriously investigated

**PALE SKIN, GIANTS, AND THE GREAT TRANSITION** MILTON E. BRENER, 2013-01-17 This book Milton Brener s third on the subject of UFOs and extraterrestrials is a giant leap He delves into an analysis of much current scientific evidence that appears to add credence to claims of early hybridization of the human race It is an entirely new and novel approach but a very readable and one It is a challenge to readers to think constructively of the new and novel It revolves around the coalescence beginning about fifty thousand years ago of several significant and scientifically proven occurrences One is the beginning of the pale skin tone of Europeans Brener systematically dismantles the accepted scientific explanation for it and drives home the fact that the only other living creatures with similar skin tone are the extraterrestrials often known to many witnesses of high credibility as Nordics Unlike other ETs these Nordics look like us though some are said to be remarkably tall and also unlike

others leave the contactees with very positive feelings Another major occurrence the great transition was the relatively sudden appearance of modern behavior including artistic genius timekeeping and creation of musical instruments The book is truly a tour de force     **The Writers Directory** ,2013     **Questioning Humanity** Thomas Osborne,Nikolas Rose,2024-06-05 This visionary book questions what it means to be human today and in the future Drawing on the natural human and life sciences Thomas Osborne and Nikolas Rose encourage us to reconsider the human condition and the ways in which humans are affected by their animality technology and the prospect of their annihilation     **Small Press Record of Books in Print** Len Fulton,1991     **Books Out-of-print** ,1980     **Beyond UFOs** Jeffrey O. Bennett,2008 Describes the startling discoveries being made in the very real science of astrobiology an intriguing new field that blends astronomy biology and geology to explore the possibility of life on other planets Jeffrey Bennett takes readers beyond UFOs to discuss some of the tantalizing questions astrobiologists grapple with every day What is life and how does it begin What makes a planet or moon habitable Is there life on Mars or elsewhere in the solar system How can life be recognized on distant worlds Is it likely to be microbial more biologically complex or even intelligent What would such a discovery mean for life here on Earth From publisher description
