**The Dark Side of News Fixing** Syed Irfan Ashraf,2021-11-02 This book provides a local journalist's perspective on a four decade long regional contribution to global news production It shows how the fixers risky news pursuits made possible for global

media to access distant regions and dangerous caves on Pakistan and Afghanistan borders causing unprecedented deaths of the local reporters in the context of the U S led war on terror The book analyzes the fixer as a role in its relationship with militarization It is not a coincidence that fixers become valuable to commercial media only during the height of violence or crises Emerging under conditions of scarcity or war the value of this role in turn is intrinsically tied to the fear of extinction It is this vulnerability or perceived expendability imposed by the need to find work that binds fixers in a symbiotic relationship with global market and global war This book then serves as a vantage point from which one can clearly see the connection between the regional wars and commercial media as well as local journalists transformation into daily wage earners in a global media shift toward neoliberalism
