Migration Changing The World:

Law and Migration in a Changing World Marie-Claire Foblets,Jean-Yves Carlier,2022-04-05 This volume comprises national reports on migration and migration law from 17 countries representing all continents The vast majority of these are countries of immigration which means they face specific challenges in terms of managing migratory flows that are increasingly linked with climate change and scarce natural resources worldwide and they need to find viable ways to integrate humanitarian migration Unlike so many recent publications in the field of international migration law this book brings together reports on diverse countries that are rarely regarded as part of one and the same picture depicting globalized migration in the contemporary era that to a large extent challenges state sovereignty The contributions delineate the legal regimes that individual states are continually developing and modifying with a view to managing and controlling access of individual persons to their respective territories They also show how the restrictive measures that states resort to in the event of failure to manage migration could have a lasting legal impact The General Report preceding the country reports provides a comparative overview of the national reports and is divided into two parts The first more technical in nature addresses the classic questions relating to admission to and residence in a country The second more reflective section examines the relationship between laws and migration in a wider and multidisciplinary perspective To allow a robust comparison the country reports all follow a similarly wide ranging structure to the extent possible they also cover the historical sociological and demographic factors that help explain legal regimes and migratory flows in each country Each country report includes analyses of recent legislative developments and delicate questions that are still awaiting adequate legal responses as well as perspectives for the future

Migration Guy Arnold, 2011-11-07 Constant migration is a worldwide phenomenon that creates sharp divisions between those who accept the need for migrants and welcome the contributions they make and those who oppose them on xenophobic grounds Guy Arnold provides a comprehensive survey of the consequences of migration Arnold studies both the massive internal migrations in China and India that drive economic development and the influx of cheap labour into the advanced economies of the USA and EU He shows that migrants are essential to advanced countries filling skills gaps and bolstering ageing and static populations He argues that the constant flow of people in all directions should be welcomed as a positive assault upon outdated narrow nationalism Packed with statistics that support the argument that migration is a force for positive change Arnold's analysis will be an excellent

Transnational Migration to Israel in Global

Comparative Context Sarah S. Willen,2007-12-05 Transnational Migration to Israel in Global Comparative Context explores

both how and why the recent influx of approximately 200 000 non Jewish migrants from dozens of countries across the globe has led state officials to declare in definitive terms that Israel is not an immigration country despite its unwavering commitment to welcoming unlimited numbers of homeward bound Jewish immigrants As this innovative volume illustrates the arrival of these economically motivated migrants about half of whom are defined by the state as legal and half as illegal has dramatically transformed the local labor economy of Israel Palestine Moreover the presence of labor migrants along with smaller groups of asylum seekers and victims of trafficking in women has also generated a wide array of complicated legal policy related cultural and ideological questions and dilemmas for the Israeli state local municipalities and civil society

Taking both the Palestinian Israeli conflict and Israel s newfound embeddedness in globalizing labor markets as backdrop this multidisciplinary collection investigates the causes as well as the consequences of these new waves of transnational migration to Israel both in comparison to other world regions and in terms of three interrelated levels of analysis first the micro level of migrants everyday experience second the meso level of state and institutional policies and practices and finally the macro level of global political economic trends and processes Bringing together a dynamic array of pioneering senior researchers along with more junior scholars the volume is distinctive not only in its incisive comparisons between Israel and other destination countries but also in its multifaceted analysis of how the Israeli migration regime has shaped constrained and on occasion been challenged by the arrival of these largely unanticipated migrants Among the themes analyzed are the relationship between transnational migration processes and the simmering Israeli
