*Excessive Pricing and Competition Law Enforcement* Yannis Katsoulacos, Frédéric Jenny, 2018-09-12 This volume examines the controversy surrounding the use of competition law to combat excessive pricing While high or monopolistic pricing is not regarded as an antitrust violation in the US employing abuse of dominance provisions in competition laws to fight excessive pricing has gained popularity in some BRICS jurisdictions and a number of EU member states in recent years The book begins by discussing the economic arguments for and against the prohibition of excessive or unfair prices by firms with market power It then presents various country studies focusing on developed countries such as the UK and Israel and on the BRICS countries to highlight various practical challenges involved in recognizing excessive prices as abusive conduct on the part of dominant firms including how to define measure and identify excessive prices The contributors also discuss other policy options that can be used to fight excessive prices in order to protect consumer welfare Data Science and Analytics

Prices, Production, and Inventories Over the Automotive Model Year Adam Copeland,2005 This paper studies the within model year pricing and production of new automobiles Using new monthly data on U S transaction prices we document that for the typical new vehicle prices typically fall over the model year at a 9.2 percent annual rate Concurrently both sales and inventories are hump shaped To explain these time series we formulate a market equilibrium model for new automobiles in which inventory and pricing decisions are made simultaneously On the demand side we use micro level data to estimate time varying aggregate demand curves for each vehicle On the supply side we solve a dynamic programming model of an automaker that while able to produce only one vintage of a product at a time may accumulate inventories and consequently sell multiple vintages of the same product simultaneously The profit maximizing pricing and production strategies under a build to stock inventory policy imply declining prices and hump shaped sales and inventories of the magnitudes observed in the data Further roughly half of the price decline is driven by inventory control considerations as opposed to decreasing demand
