Teaching with Artificial Intelligence Stamatios Papadakis,2025-11-20 This book brings together global experts to explore the transformative potential of artificial intelligence AI in early childhood and primary education Through a combination of theoretical insights and practical case studies it examines how AI technologies can enrich learning empower educators and address key challenges from the evolving needs of young learners to ethical considerations digital equity and teacher preparedness Topics covered in the book include AI assisted bilingual language development robot supported pedagogy generative AI integration and AI driven assessment tools Through real world examples and research based strategies the book demonstrates how AI can support personalised learning foster creativity and improve educational outcomes without replacing the vital role of teachers It encourages educators to engage with AI in a confident and critical manner offering guidance on implementation while maintaining a strong focus on inclusion child development and responsible practice Written in clear accessible language this book is a practical guide to the opportunities and challenges of AI enhanced education in the years ahead This timely resource will appeal to educators researchers and students of educational technology early childhood education and primary education as well as policy professionals interested in understanding how to meaningfully integrate AI into early learning environments **Sleep Science Made Simple** Alen Juginović,2025-07-16 This book brings the fascinating world of sleep biology to life in clear accessible language Dr Juginovic reveals what happens during the third of our lives we spend asleep and why it matters so profoundly for our mental and physical health Drawing on the latest research the book demystifies how sleep works explaining its powerful effects on everything from memory and metabolism to heart health immunity mental wellbeing and even cancer risk With vivid explanations and relatable examples it explores the neurobiology of sleep and how this vital process supports nearly every system in the body Whether you re new to the science of sleep a healthcare professional an athlete or a business leader striving for high performance this book offers something for everyone Chapters break down complex concepts into clear relatable language while preserving scientific depth and accuracy Sleep Science Made Simple is more than just informative it s a call to action It invites readers to rethink their sleep habits understand their importance and make lasting changes to improve overall health performance and quality of life Complex Systems and Their Applications Esteban Tlelo-Cuautle,Eric Campos-Canton,Hector Eduardo Gilardi-Velazquez,Guillermo Huerta-Cuellar,2025-08-31 This book compiles select articles presented during the Fifth Meeting for Dissemination and Research in the Study of Complex Systems and their Applications EDIESCA 2024 EDIESCA arises from the need to foster academic and research groups that carry out scientific research and further technological development at the national and international level The meeting promotes participation among graduate students industry specialists and researchers to establish collaborations on the study of complex systems and their applications that may have a strong impact on the development of new projects The study and

characterization of systems with non linear and or chaotic behavior has been of great interest to researchers around the world for which various applications have been developed The dynamic study of chaotic systems of different models for example such as R ssler Lorenz and Chua to name a few has generated important advances in areas of research on chemical reactions meteorological behavior design of electronic devices and other applications Among the best known results the study of systems that show multistability and hidden attractors has been a subject of interest in recent years generating new lines for research *Ai to Ai interface* Adam Hanrahan ,2025-12-09 We are not just building apps anymore We are wiring together minds AI agents are already talking to each other behind the scenes passing data triggering actions making decisions and moving money long before a human ever clicks buy This invisible web of machine to machine conversations is becoming the real operating system of the global economy AI to AI Interface is your field guide to that hidden layer Instead of chasing every new app tool or hype cycle this book shows you how to think in terms of interfaces clear structured ways that AIs can talk trade and collaborate with each other on your behalf You ll see how APIs webhooks and automation platforms are quietly turning into an AI to AI marketplace and how you can claim your share of it Inside you ll discover Why the next trillion dollar opportunities won t come from single apps but from ecosystems of specialized AIs working together How to design simple reliable AI to AI interfaces that connect chatbots agents APIs and back end systems into one coherent machine Practical patterns for using existing tools chatbots no code builders automation platforms and cloud APIs to build AI powered workflows that earn while you sleep How to turn your knowledge services or niche expertise into reusable AI building blocks that other agents can call and pay for The coming AI to AI economy what changes who wins and how small creators freelancers and micro businesses can plug in early instead of being left behind Written in clear non technical language for entrepreneurs solo creators and innovators this book bridges the gap between buzzwords and executable strategy You don t need to be a programmer to use these ideas You just need to understand how value flows when software can talk to software and AI can talk to AI If you ve ever felt overwhelmed by the speed of AI AI to AI Interface will give you a stable mental model a concrete roadmap and a toolkit you can start using today Stop fighting the algorithm Start designing the interfaces it will use to send you work traffic and revenue *Social Robotics* Filippo Cavallo,John-John Cabibihan,Laura Fiorini,Alessandra Sorrentino,Hongsheng He,Xiaorui Liu,Yoshio Matsumoto,Shuzhi Sam Ge,2023-01-31 The two volume set LNAI 13817 and 13818 constitutes the refereed proceedings of the 14th International Conference on Social Robotics ICSR 2022 which took place in Florence Italy in December 2022 The 111 papers presented in the proceedings set were carefully reviewed and selected from 143 submissions The contributions were organized in topical sections as follows Social robot navigation and interaction capabilities voice tactile Social robot perception and control capabilities Investigating non verbal interaction with Social robots Foster attention and engagement strategies in social robots Special Session 1 Social Robotics Driven by Intelligent Perception and Endogenous Emotion Motivation Core Special Session 2 Adaptive behavioral models of robotic

systems based on brain inspired AI cognitive architectures Advanced HRI capabilities for interacting with children Social robots as advanced educational tool Social robot applications in clinical and assistive scenarios Collaborative social robots through dynamic game Design and evaluate user s robot perception and acceptance Ethics gender trust in social robotics

Proceedings of the 2nd International Conference on Education Research Florinda Matos,Isabel Flores,Susana Martins, The Proceedings of the 2nd International Conference on Education Research 2025 includes academic research papers PhD research papers Master s Research papers and work in progress papers which have been presented and discussed at the ICER 2025 conference The proceedings are of an academic level appropriate to a professional research audience including graduates post graduates doctoral and post doctoral researchers All papers have been double blind peer reviewed by members of the Review Committee **Computer Supported Cooperative Work and Social Computing** Hailong Sun,Hongfei Fan,Yongqiang Gao,Xiaokang Wang,Dongning Liu,Bowen Du,Tun Lu,2025-03-04 This two part LNCS volumes constitutes the refereed proceedings of the 19th CCF Conference on Computer Supported Cooperative Work and Social Computing ChineseCSCW 2024 held in Hohhot China in July 12 14 2024 The 52 full papers and 18 short papers included in this book were carefully reviewed and selected from 200 submissions They were organized in topical sections as follows Part I Trend CSCW and Social Computing and Human Machine Things Fusion and Human AI Collaborative Computing Part II Crowd Cooperative Computing and Evolutionary Computation and Collaborative Data Software and Services **Hands-On Intelligent Agents with OpenAI Gym** Praveen Palanisamy,2018-07-31 Implement intelligent agents using PyTorch to solve classic AI problems play console games like Atari and perform tasks such as autonomous driving using the CARLA driving simulator Key Features Explore the OpenAI Gym toolkit and interface to use over 700 learning tasks Implement agents to solve simple to complex AI problems Study learning environments and discover how to create your own Book Description Many real world problems can be broken down into tasks that require a series of decisions to be made or actions to be taken The ability to solve such tasks without a machine being programmed requires a machine to be artificially intelligent and capable of learning to adapt This book is an easy to follow guide to implementing learning algorithms for machine software agents in order to solve discrete or continuous sequential decision making and control tasks Hands On Intelligent Agents with OpenAI Gym takes you through the process of building intelligent agent algorithms using deep reinforcement learning starting from the implementation of the building blocks for configuring training logging visualizing testing and monitoring the agent You will walk through the process of building intelligent agents from scratch to perform a variety of tasks In the closing chapters the book provides an overview of the latest learning environments and learning algorithms along with pointers to more resources that will help you take your deep reinforcement learning skills to the next level What you will learn Explore intelligent agents and learning environments Understand the basics of RL and deep RL Get started with OpenAI Gym and PyTorch for deep reinforcement learning Discover deep Q learning agents to solve discrete optimal control

tasks Create custom learning environments for real world problems Apply a deep actor critic agent to drive a car autonomously in CARLA Use the latest learning environments and algorithms to upgrade your intelligent agent development skills Who this book is for If you re a student game machine learning developer or AI enthusiast looking to get started with building intelligent agents and algorithms to solve a variety of problems with the OpenAI Gym interface this book is for you You will also find this book useful if you want to learn how to build deep reinforcement learning based agents to solve problems in your domain of interest Though the book covers all the basic concepts that you need to know some working knowledge of Python programming language will help you get the most out of it   *Building AI Agents with OpenAI SDK* Jenny F Yazzie,2025-11-17 Building AI Agents with OpenAI SDK A Hands On Guide from Novice to Expert Unlock the power of AI and learn how to build your own intelligent agents with OpenAI s cutting edge SDK Whether you re a beginner or an experienced developer this guide will take you step by step toward mastering AI agent development Building AI Agents with OpenAI SDK A Hands On Guide from Novice to Expert offers a comprehensive journey into the world of AI development guiding you through every stage of building intelligent responsive agents using OpenAI s powerful tools Starting with the basics this book takes you from setting up your environment to creating fully functional agents capable of tackling real world tasks Through a series of practical hands on projects you ll gain expertise in using AI for tasks such as natural language processing task automation and personalized recommendations By the end of this guide you ll be able to build sophisticated AI agents with the confidence to adapt them to any domain whether it s business healthcare customer service or more Benefits Step by Step Tutorials Clear instructions for building and deploying real world AI agents from simple chatbots to advanced systems Practical Hands On Projects Gain experience through practical examples and real applications that you can use in your own projects Master the OpenAI SDK Learn how to harness the full potential of OpenAI s SDK from basic API usage to complex agent creation Understand AI Ethics Build responsible transparent AI agents by learning the best practices for privacy security and fairness No Prior AI Knowledge Needed Whether you re new to AI or have some experience this book takes you from beginner to expert with no prior knowledge required Ready to dive into the world of AI Grab your copy of Building AI Agents with OpenAI SDK today and start creating intelligent agents that can transform your business enhance your workflow and tackle complex challenges with ease   **GPT-4 Complete** Mark Huck,2023   **The OpenAI Guide** Reuben Davis,2023-02-23 The OpenAI Guide is a comprehensive and accessible resource for anyone looking to learn about artificial intelligence AI and its role in our modern world From the basics of AI and its history to the latest developments in machine learning and neural networks this guide covers all the key concepts and trends in AI today Through insightful chapters on the impact of AI in various industries including business healthcare transportation and finance readers will gain a deeper understanding of the ways AI is already shaping our world and its potential for the future The guide also delves into the ethical considerations and potential risks of AI as well as the steps involved in building an AI system and the current
