[Building Business-Ready Generative AI Systems](#) Denis Rothman, 2025-07-25 Supercharge your business with context aware AI controllers adaptive agents multimodal reasoning functionality neuroscientific memory systems and flexible handler mechanisms that integrate the emerging generative AI models. Get with your book PDF copy AI Assistant and Next Gen Reader free. Key Features: Build an adaptive context aware AI controller with advanced memory strategies. Enhance GenAISys with multi domain multimodal reasoning capabilities and Chain of Thought CoT. Seamlessly integrate cutting edge OpenAI and DeepSeek models as you see fit. Book Description: Standalone LLMs no longer deliver sufficient business value on their own. This guide moves beyond basic chatbots showing you how to build agentic ChatGPT grade systems capable of sophisticated semantic and sentiment analysis powered by context engineering. You'll design AI controller architectures with multi user memory retention to dynamically adapt your system to diverse user and system inputs. You'll architect a Retrieval Augmented Generation system with Pinecone to combine instruction driven scenarios. Through context engineering you'll minimize token usage, maximize response quality and create systems that reason across complex tasks with precision. You'll enhance your system's intelligence with multimodal capabilities image generation, voice interactions and machine driven reasoning leveraging Chain of Thought and context chaining to address cross domain automation challenges. You'll also integrate OpenAI's suite and DeepSeek R1 without disrupting your existing GenAISys ecosystem. With context engineering as the backbone every step becomes a deliberate act of shaping model behavior. Your GenAISys will apply neuroscience inspired insights to marketing strategies, predict human mobility, integrate smoothly into human workflows and connect to live external data all wrapped in a polished investor ready interface. What you will learn: Implement an AI controller with a conversation AI agent and orchestrator at its core. Build contextual awareness with short term, long term and cross session memory. Design cross domain automation with multimodal reasoning, image generation and voice features. Expand a CoT agent by integrating consumer memory understanding. Integrate cutting edge models of your choice without disrupting your existing GenAISys. Connect to real time external data while blocking security breaches. Who this book is for: This book is for AI and Machine Learning Engineers seeking to enhance their understanding of Generative AI and its enterprise applications. It will particularly benefit those interested in building AI agents, creating advanced orchestration systems and leveraging AI for automation in marketing, production and logistics. Software architects and enterprise developers looking to build scalable AI driven systems will also find immense value in this guide. No prior superintelligence experience is necessary but familiarity with AI concepts is recommended.
