Quality upgrading in dairy value chains: Mixed methods evidence from southwestern Uganda Ariong, Richard M., Chamberlin, Jordan, Kariuki, Sarah Wairimu, Van Campenhout, Bjorn, 2024-07-31 Quality upgrading may be lagging in value chains where the assessment and traceability of the quality of the underlying commodity is challenging. In Uganda's southwestern milk shed a variety of initiatives are trying to increase the quality of raw milk in dairy value chains. These initiatives generally involve the introduction of technologies that enable measurement of key quality parameters at strategic nodes in the value chain in conjunction with a system that allows for tracking of these parameters throughout the supply chain. In this paper we use a combination of focus group discussions, key informant interviews and quantitative data that is generated by these initiatives to document outputs, describe emerging outcomes and reflect on the potential impact. We find clear evidence that milk quality improved but the effects on milk prices are more subtle.

Africa RISING Baseline

Evaluation Survey (ARBES) report for Ghana Tinonin, Cecilia, Azzarri, Carlo, Haile, Belyou, Comanescu, Maria, Roberts, Cleophelia, Signorelli, Sara, 2016-06-10 The International Food Policy Research Institute (IFPRI) leads an associated project on Monitoring and Evaluation of AR activities. As part of the evaluation efforts of the AR program in three regions of northern Ghana (i.e. Northern, Upper West, and Upper East) the M/E Team at IFPRI has contracted Pan African Field Services Limited (Panafields) to conduct the Ghana Africa RISING Evaluation Survey (GARBES) which has the primary objective of collecting highly credible and unbiased baseline data to evaluate the effectiveness of AR's activities. In particular, the main development hypothesis that GARBES aims to test is whether AR interventions in the form of sustainable intensification of agricultural practices lead to an increase in agricultural productivity, income and welfare indicators both monetary as well as non-monetary. The collected evidence on the overall effectiveness and on the specific causal pathways will also allow to draw conclusions on whether and how to scale up the program in the future.
