Burden or Benefit: External Data Reporting Kristina Powers,Angela E. Henderson,2016-02-08 Blazing new trails in the area of reporting and transparency Required and voluntary reporting of student data to external agencies has increased in volume quantity and complexity and understanding the scope of reporting requirements and the associated burden is critical to higher education practitioners This volume focuses on new directions in institutional reporting and the associated burden The convergence of increased reporting coupled with the demand to be more efficient with resources in a saturated and competitive higher education market make this a timely and needed volume for higher education administrators This is the 166th volume of this Jossey Bass quarterly report series Timely and comprehensive New Directions for Institutional Research provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination information analysis program evaluation and institutional management

Violating the Law of One Price Charles Engel,John H. Rogers,1999 We use new disaggregated data on consumer prices to determine why there is variability in prices of similar goods across U S cities We address questions similar to those that have arisen in the international context is this variability purely a result of market segmentation or do sticky nominal prices play a role We also examine how the degree of tradability of a good influences price variability Surprisingly we find that variability is larger for traded goods We attribute this finding to greater price stickiness for non traded goods Distance between cities accounts for a significant amount of the variation in prices between pairs of cities But we also find that nominal price stickiness plays an even more significant role

Foundations of Data and Digital Journalism Alex Richards,2023-02-14 This accessible step by step guide is written for students and working professionals who want to better understand data journalism web design and the visualization of information Foundations of Data and Digital

Journalism recognizes a growing need for general data knowledge in newsrooms across the globe including an understanding of what's possible for both data reporting and presentation and how it can be achieved. It serves as a roadmap for students and working journalists who seek to understand what data is and how to find it, how to harness it most effectively for news, how to think critically about analysis results, potential shortcomings in the data, and the inclusion of appropriate context and how to present compelling data-driven stories online. Interviews with a diverse range of current practitioners help the reader gain a deeper understanding of how these tools and techniques are used in digitally focused newsrooms today. Taking a holistic approach to data journalism, this book enables readers to assess a data set with a critical eye, understanding what it shows, how it was created, and for what purpose. Master prominent and easily accessible software tools including Google Sheets and R. Translate findings and conclusions into plain English for a news audience without overstating what the data can show or being misleading. Create impactful, attractive visualizations for an audience to explore. Understand how the modern web works, including HTML5, CSS3, and responsive webpage frameworks like Bootstrap. This is an ideal textbook for undergraduate and postgraduate journalism students and for working professionals looking to expand their skillset. The book is supported with online student resources, including example datasets to support the material covered, available at Routledge.com.

Like Nobody's Business Andrew C. Comrie, 2021-02-23. How do university finances really work? From flagship public research universities to small private liberal arts colleges, there are few aspects of these institutions associated with more confusion, myths, or lack of understanding than how they fund themselves and function in the business of higher education. Using simple, approachable explanations supported by clear illustrations, this book takes the reader on an engaging and enlightening tour of how the money flows. How does the university really pay for itself? Why do tuition and fees rise so fast? Why do universities lose money on research? Do most donations go to athletics? Grounded in hard data, original analyses, and the practical experience of a seasoned administrator, this book provides refreshingly clear answers and comprehensive insights for anyone on or off campus who is interested in the business of the university: how it earns its money, how it spends it, and how it all works.

The Economics of Education Steve Bradley, Colin Green, 2020-01-17. The Economics of Education: A Comprehensive Overview. Second Edition offers a comprehensive and current overview of the field of that is broadly accessible to economists, researchers, and students. This new edition revises the original 50 authoritative articles and adds Developed US and European and Developing Country perspectives reflecting the differences in institutional structures that help to shape teacher labor markets and the effect of competition on student outcomes. Provides international perspectives that describe the origins of key subjects, their major issues, and proponents; their landmark studies and opportunities for future research. Increases developing country perspectives and comparisons of cross-country institutions. Requires no prior knowledge of the economics of education.

Working Paper Series, 1999 CD-ROMs in Print, 2003 *Tax Policy and Consumer Spending* Katsunori Watanabe, Takayuki Watanabe, Tsutomu Watanabe, 1999. This paper studies the extent to which

the impact of tax policy on consumer spending differs between temporary and permanent as well as anticipated and unanticipated tax changes To discriminate between them we use institutional information such as legal distinction between temporary and permanent tax changes as well as timing of policy announcement and implementation We find that the impact of temporary changes is significantly smaller than the impact of permanent changes We also find that more than 80 per cent of Japanese consumers including those who distinguish between temporary and permanent tax changes respond to tax changes at the time of their implementation and not at the time of a policy announcement We suggest an interpretation that these consumers follow a near rational decision rule **Research Alert Yearbook** ,2001 *The Years That Matter Most*

Paul Tough,2019-09-12 What has gone wrong in our universities And how do we make it right When Amy applied to university she thought she d be judged purely on her merits But she never thought that her family background would have as much impact on her future as her grades When KiKi arrived at university she knew she could be the only black woman in her class But she didn t know how out of place she would feel nor how unwelcoming her peers would be When Orry graduated from university he was told he d probably land a six figure salary But he wasn t told he d end up barely scraping a living wage struggling to feed his children Drawing on the stories of hundreds of American students *The Years That Matters Most* is a revelatory account of a university system in crisis Paul Tough bestselling author of *How Children Succeed* exposes a world where small town colleges go bust while the most prestigious raise billions every year where overstretched admissions officers are forced to pick rich candidates over smart ones where black and working class students are left to sink or swim on uncaring campuses Along the way he uncovers cutting edge research from the academics leading the way to a new kind of university one where students succeed not because of their background but because of the quality of their minds The result is a call to arms for universities that work for everyone and a manual for how we can make it happen *Billboard*

Pierre-Olivier Gourinchas,Jonathan A. Parker,2000 This paper employs a synthetic cohort technique and Consumer Expenditure Survey data to construct average age profiles of consumption and income over the working lives of typical households across different education and occupation groups Using these profiles we estimate a structural model of optimal life cycle consumption expenditures in the presence of realistic labor income uncertainty The model fits the profiles quite well In addition to providing tight estimates of the discount rate and risk aversion we find that consumer behavior changes strikingly over the life cycle Young consumers behave as buffer stock agents Around age 40 the typical household starts accumulating liquid assets for retirement and its behavior mimics more closely that of a certainty equivalent consumer This change in behavior is mostly driven by the life cycle profile of expected income Our methodology provides a natural

decomposition of saving into its precautionary and retirement components Determinants of the Japan Premium Joe Peek, Eric S. Rosengren, 1998 Since August 1995 Japanese banks have had to pay a premium on Eurodollar and Euroyen interbank loans relative to their U S and U K competitors This so called Japan premium provides a market indicator of investor anxiety about the ability of Japanese banks to repay loans We examine the determinants of the Japan premium and find that government announcements not associated with concrete actions had little impact On the other hand announcements of concrete actions by the Japanese government such as injections of funds into the banking system tended to have an effect on the size of the Japan premium **On Crisis Prevention** Sebastian Edwards, 1999 This paper provides a comparative analysis of the East Asian and Mexican crises and draws lessons for the emerging economies Although much of the discussion concentrates on East Asia and Mexico I also draw on the history of some previous crisis episodes I argue that in spite of the efforts to understand the anatomy of currency crises there are still a large number of controversial and unresolved issues More to the point I argue that some of the lessons extracted from these crises are based on a misreading of the historical record As a result some of the policy implications that have emerged from this debate are to say the least questionable In particular I make two points First I argue that in general current account ratios have limited usefulness in determining a country's financial health Although I fall short of taking the position that the current account is completely irrelevant I do argue that a rigid interpretation of current account ratios may be highly misleading Second I argue that the rapidly growing popularity of controls on capital inflows as a device for reducing external vulnerability is rooted in a misreading of the recent history of external crises *Size and Growth of Japanese Plants in the United States* Bruce A. Blonigen, KaSaundra Tomlin, 1999 Using a unique database on all Japanese manufacturing plants in the United States we examine the relationship between plant size and growth for these foreign owned plants These plants average sizes are three times larger than comparable U S plants and experienced 30 percent growth from 1987 through 1990 while U S average plant sizes declined over the same period Our estimates strongly reject Gibrat's Law for these plants and suggest that smaller plants grow faster We also find learning affects plant level growth Newer plants grow quicker and previous investments by the parent firm mean slower growth particularly for automobile related plants Both are consistent with inexperienced firms growing faster as they learn *The Effects of Direct Foreign Investment on Local Communities* David N. Figlio, Bruce A. Blonigen, 1999 The large increase in direct foreign investment DFI into the United States in the late 1980s has generated considerable research on why these flows occurred and where these foreign firms located However very little has been done to evaluate the impact these foreign firms have on the local communities in which they locate As a first step in addressing this topic we use detailed county level panel data from South Carolina across 5 year intervals from 1980 through 1995 to investigate the effect of foreign manufacturing firms on local labor markets and on the level and distribution of local government budgets We find that manufacturing employment by foreign firms has a substantial impact on industry wages

and county budgets which is significantly different from domestic manufacturing employment With respect to wages we find that while increased manufacturing employment generally increases county wages in an average two digit industry this effect is more than seven times larger when the employment growth comes from a foreign firm rather than a domestic one On the budget side we find that foreign employment leads to larger declines in per capita revenues and expenditures at the county level and to significant redistribution of county expenditures away from public school funding and toward transportation and public safety Nelson Information's Directory of Investment Managers ,2006
