Google Drive Ideas Tutorial:

Envisioning the Future of Online Learning Johan Eddy Luaran, Janudin Sardi, Anealka Aziz, Nor Aziah Alias, 2016-06-10
This book shares insights into the various ways technology can be used for educational purposes utilizing an approach suitable for both novice and advanced practitioners in this niche area. It features selected papers presented at the International Conference on e Learning 2015 ICeL 2015 where professionals discussed how technology can not only serve as a tool in the classroom but as the classroom itself. As the title *Envisioning the Future of Online Learning* suggests, this book showcases current best practices in the field of e learning where technology has been leveraged to re engineer the landscape of education particularly in the context of Malaysia.

Creating Vibrant Art Lesson Plans Kristin Baxter, 2019-04-05
Writing lesson plans is often considered busywork but it can be a useful path for discovering what's important about artmaking and teaching. This book shows teachers how to slow down, breathe, and linger over the process of unit and lesson plan writing to uncover how much this process can support them professionally, creatively, and personally. The user friendly text offers guidance for selecting an art project for the unit and then zooms into the nitty gritty of specific lesson plans including how to identify materials for a project and how to construct classroom dialogue to help students develop ideas for their artwork. The text also considers standards, assessments, and extensions to other subject areas. Featuring accessible language, clear definitions, practical examples, and self reflection prompts, this unique resource will help pre and inservice teachers create lesson plans that are useful to their specific contexts and methods of teaching. If you happen to be feeling weary, frustrated, or uninspired, this book sparks imagination, fuels hope, and gives you theories to support what you know needs to be done. From the Foreword by P. Bruce Uhrmacher, Christy McConnell Moroye, and Bradley Conrad, educational researchers, Baxter invites us to slow down and consider the lesson plan as a creative catalyst to inspire our own artmaking as well as a space to examine why and what we teach. Lisa Hochtritt, Maryland Institute College of Art. An inspiring and playful resource that is much more rewarding than typical lesson planning. It will surely spark your imagination with every flip of the page. Hailey Adlard, art educator, Parkland School District, PA.

Lesson Study with Mathematics and Science Preservice Teachers Sharon Dotger, Gabriel Matney, Jennifer Heckathorn, Kelly Chandler-Olcott, Miranda Fox, 2023-10-13
This insightful volume offers an overview of the fundamentals of lesson student practice in US teacher education as well as examples from math and science teacher educators using lesson study in their local contexts. The number of teacher educators using lesson study with preservice teachers is small but growing. This book is aimed at teacher educators who may want to try lesson study in university contexts without the challenge of translating the practice from the K-12 context on their own. In this volume, lesson study is broadly overviewed; attention is given to its constituent steps, and examples of lesson study in preservice contexts are shared. Given the broad array of teacher education program designs, numerous contingencies guide teacher educators in their implementation of lesson study given their contextual affordances and limitations. The lesson study
