The Model of Ramadan Diurnal Intermittent Fasting: Unraveling the Health Implications, volume III

MoezAliIslam Ezzat Faris,Faiza Kalam,Ahmed S. BaHammam, Meghit Boumediene Khaled,Hamdi Chtourou,Dana N. Abdelrahim,2025-04-28 Intermittent fasting IF is rapidly gaining interest across scientific disciplines and also in the general community The practice of IF is a safe and costless measure that offers health improvement and disease prevention in particular in the context of chronic metabolic diseases One of the most commonly practiced models of IF at the global level is the religious form of obligatory intermittent fasting observed annually in the month of Ramadan by about 1 5 billion Muslim people A growing body of literature accumulated during the last two decades provides evidence that observing this one month religious fasting lasting between 12 17 hours a day depending on the location and season provides metabolic and physiological benefits The many health benefits of Ramadan Intermittent Fasting RIF include improvements in body weight body composition reducing complications of metabolic syndrome improving lipid profile and other cardiometabolic risk factors Further RIF helps improving glucose homeostasis ameliorating inflammatory and oxidative stress markers and modulating gene expression of various components of the anti inflammatory and antioxidant defense systems Despite being the most extensively studied form of IF many gaps remain in our understanding of the versatile effects of RIF in healthy people including athletes Further it is unclear how the observance of RIF affects patients with illnesses such as diabetes cardiovascular disease and cancer More information is needed on the effects of RIF on different body systems and the possible epigenetic changes produced by this religious practice A better understanding of RIF will help to optimize the practice of RIF maximize its health benefits and guide healthcare providers to better advise their chronically ill patients on matters related to Ramadan fasting

O'Dea,2020-07-21 When I first heard of intermittent fasting through a Pinterest post in 2017 I assumed that it too was going to be a waste of my time and that it was pretty much just a starvation diet I ve done those in the past and was miserable every step of the way Also From my own experience and those of my friends starvation diets didn t work That said I am and always have been a sucker for the next new and shiny diet plan so I gave it a try for 3 days PS this is usually how I do things I go all on board for 3 days and then I crash and burn Anyhow I didn t do a lick of research before diving straight in with a 4 hour eating window that I decided should only be between 12 noon and 4 pm I decided that I was going to have coffee with a bit of spackle powdered creamer in it for breakfast and chicken broth for lunch Any time I felt hungry through the day and it was ALL DAY hunger I would have a cup of Bengal Spice cinnamon flavored tea or a mug of chicken broth In my eating window I would eat a healthy dinner of about 1000 calories I didn t allow myself to have any sugar or anything fun to eat I white knuckled it through my 3 days I now know what I did wrong and how if you do it correctly intermittent fasting is actually pretty darn easy to stick with in the long term I ve now been at it for over a year and the stubborn 10 pounds that have plagued me my entire adult life have slowly disappeared and stayed away I get it that this sounds way too good to be true and you re likely to be skeptical If you want to get into more of the science y stuff of how this all works without simply being a starvation diet then I urge you to do some research on your own If you are still with me this is how you do it
