*Privacy and the Politics of Intimate Life* Patricia Boling, 2019-05-15 Patricia Boling investigates the implications of privacy for feminist theory and legal philosophy examining issues rooted in intimate life which have broad public impact. She draws on Hannah Arendt's work and ordinary language analysis to identify confusions in the way we think about public and private. She then uses the insights she has developed to illuminate issues in contemporary politics such as the problem of transforming private identities into political ones in the outing of lesbians and gay men. Another such issue is the relevance of the private experience of nurturing small children to the political activity of the citizen. Evenly divided between theoretical and issue oriented discussion this book makes clear the practical stakes in both the distinction and the connection between private and public. Boling considers how to translate private experience into public claims with regard to such contentious issues as shared parenting, abortion funding, fetal abuse, sodomy laws and parental consent for minors seeking abortions. She also analyzes the application of privacy in landmark legal cases including *Roe v Wade*, *Bowers v Hardwick* and *Planned Parenthood v Casey*.

Performativity, Materiality and Time Anja Kraus, Mie Buhl, Gerd-Bodo von Carlsburg, 2014 Focusing mainly on the tacit side of pedagogical practices entails not only a revision of instructional practices but also that of the existing theoretical approaches to educational practices and learning and a work on the methodology of empirical research in the Educational Sciences. In terms of this effort references to subjects, objects and given structures are replaced by the concepts performativity, materiality and time. In this volume the paradigm shift is applied to different educational fields, questions and methodologies such as the performativity in imaginary mediated and virtual spaces and other tacit subjects of learning such as language education, the ethical implications of the adult child differentiation, educational research on things and the mastery of university by the students.
